Gender Budgeting Report Bangladesh. Artha Bibhāga,2018 , **The Routledge Companion to Migration, Communication, and Politics** Stephen Croucher,Joao Caetano,Elsa Campbell,2018-12-07 The Routledge Companion to Migration Communication and Politics brings together academics from numerous disciplines to show the legal political communicative theoretical methodological and media implications of migration The collection makes the compelling case that migration does not occur in a vacuum rather it is driven by and reacts to various factors including the political economic and cultural worlds in which individuals live The 25 chapters reveal the complex nature of migration from various angles not only looking at how policy affects migrants but also how individuals and marginalized groups are impacted by such acts In Part I contributors examine migration law debating the role of the state in managing migration flows and investigating existing migration policy Part II offers theories and methods that integrate communication studies political science and law into the study of migration including cultural fusion theory and Gebserian theory Part III looks at how contemporary perceptions of migration and migrants intersect with media representations across media outlets worldwide Finally Part IV offers case studies that present the intricacies of migration within different cultural national and political groups Migration is the key

political economic and cultural issue of our time and this companion takes the next step in the debate namely the effects of the how in addition to the how and why Researchers and students of communication politics media and law will find this an invaluable intervention

Learning in a Digital World Michael E. Auer, David Guralnick, Istvan Simonics, 2018-02-09 This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning ICL2017 held in Budapest Hungary on 27 29 September 2017 The authors are currently witnessing a significant transformation in the development of education The impact of globalisation on all areas of human life the exponential acceleration of technological developments and global markets and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general but especially in engineering education To face these current real world challenges higher education has to find innovative ways to quickly respond to them Since its inception in 1998 this conference has been devoted to new approaches in learning with a focus on collaborative learning Today the ICL conferences offer a forum for exchange concerning relevant trends and research results and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context **Improving Working Memory in Learning and Intellectual**

Disabilities Silvia Lanfranchi, Barbara Carretti, 2016-08-05 The last forty years of research have demonstrated that working memory WM is a key concept for understanding higher order cognition To give an example WM is involved in reading

comprehension problem solving and reasoning but also in a number of everyday life activities It has a clear role in the case of atypical development too For instance numerous studies have shown an impairment in WM in individuals with learning disabilities LD or intellectual disabilities ID and several researchers have hypothesized that this can be linked to their difficulties in learning cognition and everyday life The latest challenge in the field concerns the trainability of WM If it is a construct central to our understanding of cognition in typical and atypical development then specific intervention to sustain WM performance might also promote changes in cognitive processes associated with WM The idea that WM can be modified is debated however partly because of the theoretical implications of this view and partly due to the generally contradictory results obtained so far In fact most studies converge in demonstrating specific effects of WM training i e improvements in the trained tasks but few transfer effects to allied cognitive processes are generally reported It is worth noting that any maintenance effects when investigated are even more meagre In addition a number of methodological concerns have been raised in relation to the use of 1 single tasks to assess the effects of a training program 2 WM tasks differing from those used in the training to assess the effects of WM training and 3 passive control groups These and other crucial issues have so far prevented any conclusions from being drawn on the efficacy of WM training Bearing in mind that the opportunity to train WM could have a huge impact in the educational and clinical settings it seems fundamentally important to shed more light on the limits and potential of this line of research The aim of the research discussed here is to generate new evidence on the feasibility of training WM in individuals with LD and ID There are several questions that could be raised in this field For a start can WM be trained in this population Are there some aspects of WM that can be trained more easily than others Can a WM training reduce the impact of LD and ID on learning outcomes and on everyday living What kind of training program is best suited to the promotion of such changes
