Fognet's Field Guide to OpenView Network Node Manager Mike Peckar, 2006 **Fognet's Field Guide to Openview Network Node Manager, 2nd Edition** Mike Peckar, 2008 This guide is written for field consultants users and administrators of the HP OpenView Network Node Manager NNM software product It was written for those who seek a shortcut to commonly used product info that is either missing or obfuscated in the product docs and it covers practical implementation information that can't be found in any product manuals or the product man ref pages This guide was gleaned from OpenView users and from the author's thirteen years of compiled notes on the product The 2nd edition covers all 7 x features through 7 53 and features expanded and improved content totaling 353 pages Note This edition has a brief description of NNM 8i features but should NOT be purchased to help with NNM 8i installations *OpenView Network Node Manager* John Blommers, 2001 PLEASE PROVIDE COURSE INFORMATION PLEASE PROVIDE **Networks and Systems Management** Iosif G. Ghetie, 1997-03-31 The deployment of communications networks and distributed computing systems requires the use of open standards based integrated management systems During the last five years the overall industry effort to develop enhance and integrate management systems has crystallized in the concept of management platforms Management platforms are software systems which provide open multi vendor multiprotocol distributed management services They allow multiple management applications to run over core platform services which constitute the essential part of the management platform framework This book provides a comprehensive analysis of the features and technical characteristics of distributed management platforms by examining both qualitative and quantitative management capabilities required by each management platform service The analysis covers the management platform run time environment the operational aspects of using management platforms the development environment which consists of software toolkits that are used to build management applications the implementation environment which deals with testing interoperability aspects of using management platforms and of course the distributed applications services which platforms make available to management applications Finally the analysis covers the capabilities of several management applications either generic or specific to devices or resources which run on top of management platforms Essential SNMP Douglas R. Mauro, Kevin James Schmidt, Kevin J. Schmidt, 2001 A practical introduction to SNMP for system network administrators Starts with the basics of SNMP how it works and provides the technical background to use it effectively Essential SNMP Douglas Mauro, Kevin Schmidt, 2005-09-21 Simple Network Management Protocol SNMP provides a simple set of operations that allows you to more easily monitor and manage network devices like routers switches servers printers and more The information you can monitor with SNMP is wide ranging from standard items like the amount of traffic flowing into an interface to far more esoteric items like the air temperature inside a router In spite of its name though SNMP is not especially simple to learn O'Reilly has answered the call for help with a practical introduction that shows how to install configure and manage SNMP

Written for network and system administrators the book introduces the basics of SNMP and then offers a technical background on how to use it effectively Essential SNMP explores both commercial and open source packages and elements like OIDs MIBs community strings and traps are covered in depth The book contains five new chapters and various updates throughout Other new topics include Expanded coverage of SNMPv1 SNMPv2 and SNMPv3 Expanded coverage of SNMPc The concepts behind network management and change management RRDTool and Cricket The use of scripts for a variety of tasks How Java can be used to create SNMP applications Net SNMP s Perl module The bulk of the book is devoted to discussing with real examples how to use SNMP for system and network administration tasks Administrators will come away with ideas for writing scripts to help them manage their networks create managed objects and extend the operation of SNMP agents Once demystified SNMP is much more accessible If you re looking for a way to more easily manage your network look no further than Essential SNMP 2nd Edition **StarBriefs 2001** ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions UNIX Review ,1994-07 **Network World** ,1992-09-07 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce **InfoWorld** ,1999-03-08 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects
