Rainy Day Essay For Class 3:

Guidance in Education Srinibas Bhattacharya, 1963 **The Homestead**, 1925 **The Nature of Order, Book Three: A Vision of A Living World** Christopher Alexander, 2020-03-30

Christopher Alexander's series of ground breaking books including *A Pattern Language* and *The Timeless Way of Building* have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns. Now in *The Nature of Order* Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities. From a practical point of view *A Vision of a Living World* is the most compelling of the four books. Hundreds of photographs and plans of new buildings that have living structure and the processes which gave them life demonstrate for the first time what the concept of living structure can mean in buildings of our time and of the future. The really good building. The really good space. Places that reach an archetypal level of human experience reaching across centuries across continents across cultures across technology across building materials and climates. They connect us to ourselves. They connect us to our feelings. What is more as we study them we realize that they all share a similar geometry. How are they made. The practical task of making beauty is the principal subject of this volume. Hundreds of examples of buildings and places are shown. New forms for large buildings public spaces communities neighborhoods lead to discussions about equally important small scale of detail and ornament and colour. Many of the examples are built by Alexander and his colleagues other buildings explored take us around the world and through time. With these examples lay people architects builders artists and students are able to make this new framework real for themselves understand how it works and understand its significance. The book is a feast for the eyes and mind and heart. Places created by living process. Book 2 have living structure. Book 1 and they connect us to our essence as people. Book 4. The seven hundred pictures of Alexander's buildings and works of art shown in this book demonstrate in detail what he means. Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart. A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united. *The Nature of Order* constitutes the backbone of Building Beauty Ecologic Design Construction Process an initiative aimed at radically reforming architecture education with the emphasis of making as a way to access a transformative vision of the world. The 15 fundamental properties of life guide our work and have given us much more than a set of solutions. *The Nature of Order* has given us the framework in which we can search and build up our own solutions. In order to be authentically sustainable buildings and places have to be cared for and loved over generations. Beautiful buildings and places are more likely to be loved and they become more beautiful and loved through the attention given to them over time. Beauty is therefore not a

luxury or an option it includes and transcends technological innovation and is a necessary requirement for a truly sustainable culture **Public Documents** West Virginia,1907 *Co-operative News and Journal of Associated Industry* ,1891
