Charash,1991 Here is a thoughtful new book for professionals who assist persons afflicted

with neuromuscular disorders to help them and their families adapt to lifestyle changes accompanying the onset of these disorders. Health care professionals provide strategies to maintain the psychosocial well being of children and adults with neuromuscular disorders which in addition to physical damage also assault the sense of self and challenge the individual's ability to move and communicate. Chapters describe the psychosocial aspects of a variety of neuromuscular diseases such as Duchenne and myotonic muscular dystrophy, multiple sclerosis, amyotrophic lateral sclerosis, Friedreich's ataxia, and Charcot-Marie-Tooth disease. The distinctive characteristics of each disease are examined with special attention given to the natural history, treatment, management, and psychosocial issues of the specific disorder. Beyond the clinical and research importance of Muscular Dystrophy and Other Neuromuscular Diseases, it also addresses the anxiety, doubts, and questions felt by patients with chronic progressive disabilities and their families. This helpful guide is unique in the way it features the interaction of professionals in the social services, psychology, religion, and various medical specialties in the care and treatment of these patients. Professionals in all of these disciplines as well as the patients and families afflicted by these disorders will benefit from this valuable resource. Adolescent Maltreatment, 1984 *Child Maltreatment* Dante Cicchetti, Vicki

Carlson, 1989-06-30 Over forty contributors including highly regarded researchers in the field present the most recent findings on the impact of abuse and neglect on cognitive, linguistic, social, and emotional development in children. *The Adolescent in the Family* Patricia Noller, Victor Callan, 2015-12-22 Adolescence can be a difficult time for all concerned. Issues such as high youth unemployment, sexual behaviour, and drug abuse have made it a matter of great concern for the community at large, whether as parents, politicians, or those working with adolescents in education and welfare. In addition, many parents fear that these problems could affect their own families. Originally published in 1991, the authors explore the complex needs of adolescents, emphasising the importance of the family environment in helping adolescents cope with the many difficulties and changes they face during this period of their lives. The central theme is that adolescents, through conflict and negotiation, establish new but different relationships with their parents, relationships that can endure for a lifetime. The authors provide wide coverage of the key issues of adolescence, such as identity, separation from the family, and conflict, and look closely at the difficulties produced by events such as the divorce and remarriage of parents and social problems such as long-term unemployment. With its positive approach to the family and adolescents, this clear, concise, and helpful book will be invaluable both to parents and to the many professionals whose work involves them with adolescents. **Developmental**

psychology and sociology of development provide educators and practitioners with insights into the specific social contexts of human behavior and help identify variables and deviations This second edition features up to date empirical information including additional studies on diverse populations and a new chapter on attachment theory a growing area of interest for today s clinicians
