Adrift On A Sea Of Stars:

Adrift on a Sea of Stars John Stilwell, 2014-10-30 For years space telescopes had found four nearby stars very promising The first fleet consisted of three crafts faster than anything ever built Their mission was to visit them to survey for possible habitable worlds More advanced the second fleet was planned to be launched decades later with the goal of landing on alien worlds Fifty years beyond that the third fleet would carry a cargo of frozen colonists Everything went as planned until the crews of first fleet woke up near their selected stars Sometime during the long interstellar voyage Earth had stopped transmitting Were they still listening There was no sign of the second or third fleets All that was certain was that they were all alone An Ocean of Stars John Stilwell, 2019-05-26 This omnibus contains all four books of the Adrift on a Sea of Stars series Together they tell the epic saga of the crew of the Beagle sent to explore our stellar neighborhood When the crew wake up from paused sleep they discover that Earth had been silent for decades In Earth not Forgotten an expedition is sent to Earth The crew of the Beagle and their alien benefactors find the unexpected Before they can report back the alien

Forevership falls victim to betrayal and deceit In The Tarden Agenda Earth has joined the Republic of Worlds It s a new beginning Some think the Tarden have created a utopia Others question if the overlords are as benevolent as they seem In Republic and Empire Ducus Iratus rules Earth with an iron fist He dreams of becoming Emperor of known space The crew of the Beagle become a kick ball between alien dictators the ruthless Republic and two rogue Artificial intelligences *The Complex Lives of Star Clusters* David Stevenson, 2015-05-09 As with the author s recent books Extreme Explosions and Under a Crimson Sun the complex topic of star clusters is broken down and made accessible with clear links to other areas of astronomy in a language which the non specialist can easily read and enjoy The full range of topics are addressed regarding how star clusters are formed Why is it some are dense conglomerates of stars while others are looser associations Are the young brilliant clusters seen in neighboring galaxies such as the Large Magellanic Cloud M33 or M82 analogous to the ancient globulars seen in the Milky Way How will these clusters change as their stars wane and die More interestingly how does living in a dense star cluster affect the fates of the stars and any attendant planets that accompany them Star clusters form many of the most dazzling objects in the astronomers catalogs Many amateur astronomers are interested in exploring how these objects are created and what it would be like to live among these objects From the historical views of how star clusters came about to the most recent assumptions about how stars within these clusters evolve different strands of science from observation to theory are woven together into a compelling investigation specifically targeted at amateur astronomers
