The Enemy is Within Helen Efthimiades-Keith, 2021-10-01 Efthimiadis Keith addresses questions of the historicity of the book of Judith using a more subjective definition of truth than simple fact or fiction she interprets the text through Jungian methodology as

a dream of the unconscious psyche of the Jewish people true in its reflection of their collective identity at the time of the text's composition. The author merges Terrence Dawson's literary theory concerning the discernment of the effective protagonist of a narrative with Jungian's method of dream interpretation to analyze the text subjectively from the effective protagonist's point of view. The author then extrapolates the book's contents onto a hypothetical historical situation to contextualize the book within the Jewish identity and uses her findings to conduct objective analysis. The work, authored by an international group of Jungian scholars, expands upon the socio-cultural, psychological, therapeutic, and philosophical import of this key pillar of the Jungian oeuvre, offering a compelling alternative to current culturally dominant ideas about how change occurs. The book addresses varied aspects of his teleological thought generally and its application to the psychotherapeutic endeavor, specifically engaging Freudian, neo-Freudian, and related theoretical orientations in an informed dialogue about the critical issue of the emergent unfolding of subjectivity in treatment. This is an illuminating read for those interested in the study of Jungian theory, psychoanalysis, social psychology, religion, transpersonal psychology, indigenous wisdom traditions, and philosophical metapsychology. Exploring the Collective Unconscious in the Age of Digital Media Schafer, Stephen Brock, 2016-01-28 For decades we have witnessed the emergence of a media age of illusion that is based on the principles of physics: the multidimensionality, immateriality, and non-locality of the unified field of energy and information as a virtual reality. As a result, a new paradigm shift has reframed the cognitive unconscious of individuals and collectives and generated a worldview in which mediated illusion prevails. *Exploring the Collective Unconscious in a Digital Age* investigates the cognitive significance of an altered mediated reality that appears to have all the dimensions of a dreamscape. This book presents the idea that if the digital media sphere proves to be structurally and functionally analogous to a dreamscape, the Collective Unconscious researched by Carl Jung and the Cognitive Unconscious researched by George Lakoff are susceptible to research according to the parameters of hard science. This pivotal research-based publication is ideally designed for use by psychologists, theorists, researchers, and graduate-level students studying human cognition and the influence of the digital media revolution.

Chapter 3. Archetype Semantics: How It Corresponds To The Concept Of "An Image." How Archetypal Are Images? Andrey Davydov, Olga Skorbatyuk, 2017-09-16 An image is archetypal only when it is an individual value which, through natural analogs, allows a person to learn about himself, obtain information about his individual qualities recorded in the individual structure of the psyche, which ultimately allows a person to legalize his own innate qualities. The authors reason that logically an archetype in its traditional consideration cannot be that prototype preimage which, as an initial idea, determines the individual human psyche because, by definition, it belongs to culture; it is its artifact. Consequently,

according to existing semantics an archetype can be anything except an archetype as an idea This scientific paper examines whether semantics of an archetype in its traditional sense corresponds to the concept of an image if an image is considered in terms of a copy a duplicate can an archetype of culture be seriously considered as something that directly forms individual human psyche as a structure that appeared long before symbolism The authors think that not every image is archetypal because not every image is equal to prototype preimage as an initial idea corresponding to the concept of an archetype An image is archetypal only when it is an individual value which through natural analogues allows a person to learn about his own self and learn about his individual qualities recorded in the individual structure of psyche which as a result provides a person with a possibility to legalize his own innate qualities *Collage as a Creative Coaching Tool* Andréa
