A large, abstract graphic composed of several interlocking, three-dimensional red rectangular blocks. The blocks are arranged in a complex, overlapping fashion, creating a sense of depth and geometric complexity. The lighting is dramatic, with strong highlights and deep shadows, emphasizing the three-dimensional nature of the shapes. The background is a solid dark color, making the red blocks stand out prominently.

**Strategic Marketing Management - The Framework, 10th Edition** Alexander Chernev, 2019-01-01 Strategic Marketing Management The Framework outlines the essentials of marketing theory and offers a structured approach to identifying and solving marketing problems This book presents a strategic framework to guide business decisions involving the development of new offerings and the management of existing products services and brands      *Strategic Marketing Management: Theory and Practice* Alexander Chernev, 2019-01-01 Strategic Marketing Management Theory and Practice offers a systematic overview of the fundamentals of marketing theory defines the key principles of marketing management and presents a value based framework for developing viable market offerings The theory presented stems from the view of marketing as a value creation process that is central to any business enterprise The discussion of marketing theory is complemented by a set of practical tools that enable managers to apply the knowledge contained in the generalized frameworks to specific business problems and market opportunities The information on marketing theory and practice contained in this book is organized into eight major parts The first part defines the essence of marketing as a business discipline and outlines an overarching framework for marketing management that serves as the organizing principle for the information presented in the rest of the book Specifically we discuss the role of marketing management as a value creation process the essentials of marketing strategy and tactics as the key components of a company's business model and the process of developing an actionable marketing plan Part Two focuses on understanding the market in which a company operates Specifically we examine how consumers make choices and outline the main steps in the customer decision journey that lead to the purchase of a company's offerings We further discuss the ways in which companies conduct market research to gather market insights in order to make informed decisions and develop viable courses of action Part Three covers issues

pertaining to the development of a marketing strategy that will guide the company's tactical activities. Here we focus on three fundamental aspects of a company's marketing strategy: the identification of target customers, the development of a customer value proposition, and the development of a value proposition for the company and its collaborators. The discussion of the strategic aspects of marketing management includes an in-depth analysis of the key principles of creating market value in a competitive context. The next three parts of the book focus on the marketing tactics viewed as a process of designing, communicating, and delivering value. Part Four describes how companies design their offerings and specifically how they develop key aspects of their products, services, brands, prices, and incentives. In Part Five we address the ways in which companies manage their marketing communication and the role of personal selling as a means of persuading customers to choose purchase and use a company's offerings. Part Six explores the role of distribution channels in delivering the company's offerings to target customers by examining the value delivery process both from a manufacturer's and a retailer's point of view. The seventh part of the book focuses on the ways in which companies manage growth. Specifically, we discuss strategies used by companies to gain and defend market position and in this context address the issues of pioneering advantage, managing sales growth, and managing product lines. We further address the process of developing new market offerings and the ways in which companies manage the relationship with their customers. The final part of this book presents a set of tools that illustrate the practical application of marketing theory. Specifically, Part Eight delineates two workbooks: a workbook for segmenting the market and identifying target customers, and a workbook for developing the strategic and tactical components of a company's business model. This part also contains examples of two marketing plans: one dealing with the launch of a new offering and the other focused on managing an existing offering.
