A photograph of a white egg being compressed by a metal vise. The egg is positioned between the two jaws of the vise, which are made of dark, weathered metal. The egg is slightly flattened at the top and bottom where it meets the jaws. The background is dark, and the lighting highlights the smooth, slightly textured surface of the egg and the metallic sheen of the vise.

Approximating Perfection A Mathematicians Journey Into The World Of Mechanics:

Approximating Perfection Leonid P. Lebedev, Michael J. Cloud, 2015-07-28 This is a book for those who enjoy thinking about how and why Nature can be described using mathematical tools Approximating Perfection considers the background behind mechanics as well as the mathematical ideas that play key roles in mechanical applications Concentrating on the models of applied mechanics the book engages the reader in the types of nuts and bolts considerations that are normally avoided in formal engineering courses how and why models remain imperfect and the factors that motivated their development The opening chapter reviews and reconsiders the basics of calculus from a fully applied point of view subsequent chapters explore selected topics from solid mechanics hydrodynamics and the natural sciences Emphasis is placed on the logic that underlies modeling in mechanics and the many surprising parallels that exist between seemingly diverse areas The mathematical demands on the reader are kept to a minimum so the book will appeal to a wide technical audience
