**U.S. Army The Applied Critical Thinking Handbook** , Why Red Teaming The premise of the program at the University of Foreign Military and Cultural Studies UFMCS is that people and organizations court failure in predictable ways that they do so by degrees almost imperceptibly and that they do so according to their mindsets biases and experience which are formed in large part by their own culture and context The sources of these failures are simple observable and lamentably often repeated They are also preventable and that is the point of red teaming Our methods and education involve more than Socratic discussion and brainstorming We believe that good decision processes are essential to good outcomes To that end our curriculum is rich in divergent processes red teaming tools and liberating structures all aimed at decision support We educate people to develop a disposition of curiosity and help them become aware of biases and behavior that prevent them from real positive change in the ways they seek solutions and engage others We borrow techniques methods frameworks concepts and best practices from several sources and disciplines to create an education and practical applications that we find to be the best safeguard against individual and organizational tendencies toward biases errors in cognition and groupthink Red teaming is diagnostic preventative and corrective yet it is neither predictive or a solution Our goal is to be better prepared and less surprised in dealing with complexity What is Red Teaming Red teaming is a function that provides commanders an independent capability to fully explore alternatives in plans operations concepts organizations and capabilities in the context of the operational environment OE and from the perspectives of partners adversaries and others A Red Team performs three general types of tasks Support to operations planning and decision support Critical review and analysis of already existing plans Intelligence support Threat Emulation UFMCS provides education for the first two tasks TRADOC s Intelligence School and Center provides education on the third In order for a Red Team to effectively contribute to decision making all of the following elements are required The ability to think critically about the problem While this may seem obvious the reality is that critical thinking is a skill set that requires training education and tools The Army assimilates people from different backgrounds across the nation One of the drawbacks of that assimilation is our military tendency to reflect the same biases and perspectives We pride ourselves in common values which while ingrained in the Army culture are not universal outside of that culture Thinking critically and challenging the group is an unnatural act for military staffs Doing so effectively requires tools and methods that enable leaders to see different perspectives Red Teams require top cover to be allowed to challenge the conventional wisdom and the organization s leaders No matter the quality of the Red Team or the methods they employ dictatorial or toxic leaders are incompatible with successful red teaming Red teaming is not easy and not everyone can do it Red Teamers must be effective written and oral communicators They must have credibility in the area in which they are providing red teaming insights They must be able to constructively challenge the plan This means focusing on what is truly important able to explain why it is being challenged and offering some alternative ways to think about the

problem      **U.S. Military Operations** Geoffrey S. Corn, Rachel E. VanLandingham, Shane R. Reeves, 2016 In U S Military Operations Law Policy and Practice a distinguished group of military experts comprehensively analyze how the law is applied during military operations on and off the battlefield Subject matter experts offer a unique insiders perspective on how the law is actually implemented in a wide swath of military activities such as how the law of war applies in the context of multi state coalition forces and whether non governmental organizations involved in quasi military operations are subject to the same law The book goes on to consider whether U S Constitutional 4th Amendment protections apply to the military s cyber defense measures how the law guides targeting decisions and whether United Nations mandates constitute binding rules of international humanitarian law Other areas of focus include how the United States interacts with the International Committee of the Red Cross regarding its international legal obligations and how courts should approach civil claims based on war related torts This book also answers questions regarding how the law of armed conflict applies to such extra conflict acts as intercepting pirates and providing humanitarian relief to civilians in occupied territory      **Federal Register** ,2014

*Regional Impacts of EPA Carbon Regulations* United States. Congress. Senate. Committee on Environment and Public Works, 2015      *Travellers, Merchants and Settlers in the Eastern Mediterranean, 11th-14th Centuries* David Jacoby, 2023-05-31 This collection of studies the eighth by David Jacoby covers a period witnessing intensive geographic mobility across the Mediterranean illustrated by a growing number of Westerners engaging in pilgrimage crusade trading and shipping or else driven by sheer curiosity This movement also generated western settlement in the eastern Mediterranean region A complex encounter of Westerners with eastern Christians and the Muslim world occurred in crusader Acre the focus of two papers a major emporium it was also the scene of fierce rivalry between the Italian maritime powers The fall of the crusader states in 1291 put an end to western mobility in the Levant and required a restructuring of trade in the region The next five studies show how economic incentives promoted western settlement in the Byzantine provinces conquered by western forces during the Fourth Crusade and soon after Venice fulfilled a major function in Latin Constantinople from 1204 to 1261 The city s progressive economic recovery in that period paved the way for its role as transit station furthering western trade and colonization in the Black Sea region Venice had also a major impact on demographic and economic developments in Euboea located along the maritime route connecting Italy to Constantinople On the other hand military factors drove an army of western mercenaries to establish in central Greece a Catalan state which survived from 1311 to the 1380s      **Military Review** ,2017      **Drones and Unmanned Aerial Systems** Aleš Završnik, 2015-12-23 This book tackles the regulatory issues of Unmanned Aerial Systems UAS or Remotely Piloted Aerial Systems RPAS which have profound consequences for privacy security and other fundamental liberties Collectively known as drones they were initially deployed for military purposes reconnaissance surveillance and extrajudicial executions Today we are witnessing a growth of their use into the civilian and humanitarian domain They are increasingly used for goals as

diverse as news gathering aerial inspection of oil refinery flare stacks mapping of the Amazonian rain forest crop spraying and search and rescue operations The civil use of drones is becoming a reality in the European Union and in the US The drone revolution may be a new technological revolution Proliferation of the next generation of recreational drones show how drones will be sold as any other consumer item The cultural perception of the technology is shifting as drones are increasingly being used for humanitarian activities on one hand but they can also firmly be situated in the prevailing modes of postmodern governance on the other hand This work will be of interest to researchers in Criminology and Criminal Justice interested in issues related to surveillance security privacy and technology It will also provide a criminological background for related legal issues such as privacy law aviation law international criminal law and comparative law
