Methodological Issues in Applied Social Psychology Fred B. Bryant, John Edwards, R. Scott Tindale, Emil J. Posavac, Linda Heath, Eaaron Henderson-King, Yolanda Suarez-Balcazar, 2013-11-11

Many authors have argued that applying social psychology to the solution of real world problems builds better theories. Observers have claimed for example that of human behavior applied social psychology reveals more accurate principles because its data are based on people in real life circumstances. Helmreich 1975, Saxe Leventhal 1980 and discloses important gaps in existing theories. Fisher 1982, Mayo LaFrance 1980. Undoubtedly many concrete examples can be mustered in support of these claims. But it also can be argued that applying social psychology to social issues and problems builds better research methods. Special methodological problems arise and new perspectives on old methodological problems emerge when researchers leave the laboratory and tackle social problems in real world settings. Along the way we not only improve existing research techniques but also develop new research tools all of which enhance our ability to obtain valid results and thereby to understand and solve socially relevant problems. Indeed Campbell and Stanley's 1966 seminal work on validity in research design grew out of the application of social science in field settings. In this spirit the principal aim of this volume is to present examples of methodological advances being made as researchers apply social psychology in real life settings.

In order to effectively encourage good health related behaviors among adolescents health providers need an integrated understanding of the many factors involved. This volume fills that need by providing the most comprehensive up to date review of the pertinent issues including in depth discussions on adolescent sexuality substance abuse the future of adolescent health promotion.

The applied chapters discuss how community psychology relates to mental health, social and health services, schools and children, law and crime, health and public health, and community organizational psychology. The new edition updates research and literature and presents developments in theoretical and research methodologies. This edition focuses particularly on description and consideration of critical theory, liberation theology, and decolonization as part of community psychology's intellectual and value-based evolution.
