*of the East* Yasheng Huang, 2023-01-01 The long history of China's relationship between stability, diversity and prosperity and how its current leadership threatens this delicate balance Riveting Tunku Varadarajan Wall Street Journal A Foreign Affairs Best Book of 2023 Chinese society has been shaped by the interplay of the EAST exams, autocracy, stability and technology from ancient times through the present Beginning with the Sui dynasty's introduction of the civil service exam known as Keju in 587 CE and continuing through the personnel management system used by the Chinese Communist Party (CCP) Chinese autocracies have developed exceptional tools for homogenizing ideas, norms and practices But this uniformity came with a huge downside: stifled creativity Yasheng Huang shows how China transitioned from dynamism to extreme stagnation after the Keju was instituted China's most prosperous periods such as during the Tang dynasty (618-907) and under the reformist CCP occurred when its emphasis on scale, the size of bureaucracy was balanced with scope, diversity of ideas Considering China's remarkable success over the past half century Huang sees signs of danger in the political and economic reversals under Xi Jinping The CCP has again vaulted conformity above new ideas reverting to the Keju model that eventually led to technological decline It is a lesson from China's own history Huang argues that Chinese leaders would be wise to take seriously

**Malawi Youth Status Report ...**, 2016 **Pathways to Prosperity in Rural Malawi** Andrew Dabalen, Alejandro de la Fuente, Aparajita Goyal, Wendy Karamba, Tomomi Tanaka, 2017-07-06 By most accounts rural Malawi has lacked dynamism in the past decade Growth has been mostly volatile in large part due to unstable macroeconomic fundamentals evidenced by high inflation, fiscal deficits and interest rates When rapid economic growth has materialized the gains have not always reached the poorest Poverty remains high and the rural poor face significant challenges in consistently securing enough food Several factors contribute to stubbornly high rural poverty They include a low productivity and non-diversified agriculture, macroeconomic and recurrent climatic shocks, limited non-farm opportunities and low returns to such activities especially for the poor and poor performance from some of the prominent safety net programs The Report proposes complementary policy actions that offer a possible path for a more dynamic and prosperous rural economy The key pillars of this comprise macroeconomic stability, increased productivity in agriculture, faster urbanization, better functioning safety nets and more inclusive financial markets Some recommendations call for a reorientation of existing programs such as the Malawi Farm Input Subsidy Program (FISP) and the Malawi Social Action Fund Public Works Program (MASAF PWP) Others identify promising new areas of intervention such as the introduction of digital IDs and biometric technologies to enhance the reach of mobile banking and deepen financial inclusion Finally and importantly the report recommends the scaling up of investments on girls' secondary education to curb early child marriage

and early child bearing among adolescents This will empower women at home and work and bend the trajectory of fertility rates in rural areas in order to boost human development and reduce poverty      *Case Reports in General Cardiovascular Medicine: 2022* Leonardo Roever,Junjie Xiao ,Pietro Enea Lazzerini,2024-10-10 This Research Topic aims to collect all the Case Reports submitted to the General Cardiovascular Medicine section All the Case Reports submitted to this collection will be personally assessed by the Specialty Chief Editor before the beginning of the peer review process Please make sure your article adheres to the following guidelines before submitting it Case Reports highlight unique cases of patients that present with an unexpected diagnosis treatment outcome or clinical course Only Case Reports that are original and significantly advance the field will be considered 1 RARE case with TYPICAL features 2 FREQUENT case with ATYPICAL features 3 Cases with a convincing response to new treatments i e single case of off label use      Machine Learning and Analytics in Healthcare Systems Himani Bansal,Balamurugan Balusamy,T.
