Chamberlain, 2007-09-10 This new work by Neil W Chamberlain will be of great importance to the business community and to all those charged with defining the role large corporations play in the affairs of society Social Strategy and Corporate Structure is an objective indepth examination of the organizational requirements of a social role for large scale business The role Neil Chamberlain presents is one of heroic dimensions the political choice of goals the strategic allocation of resources and the tactical operations of the mechanisms of production While there has been much discussion of corporate social responsibility few have investigated the ways its structure will have to change if the corporation is to pursue a strategy that is both economic and social This timely book integrates a large number of issues involving corporate activities and governance that go directly to the heart of this problem In step by step detail Chamberlain analyzes the organizational imperatives of this new age of social responsibility the composition and functions of boards of directors and the relation of their duties to a broad system of national planning the internal social audit changes in the characteristics of corporate social planning and proposals for restructuring ultimate corporate authority either through public or outside directors In addition he examines the potential relevance of federal chartering of corporations and the effects of international economic interdependence on the development of a new corporate social strategy This book is not a detailed blueprint for change Rather it presents a thorough systematic study of available courses of action for improvement based on the principle that conventional notions of corporate independence will have to be modified for any social strategy to work And while not everyone will agree with Neil Chamberlain few can afford to ignore his provocative insights into what corporations must do to function effectively in a changed social environment      *Export Strategy: Markets and Competition (RLE Marketing)* Nigel Piercy, 2014-09-15 This book offers management students and managers new insights by approaching exporting from the perspective of marketing

*Planning, Politics and the State* Nicholas Low,2013-09-13 First Published in 1990 John Maynard Keynes once made the bold prediction that the three hour work day would prevail for his grandchildren s generation Seventy years later the question of working time is as pertinent as it was at the inception of the 40 hour week Not until now however has there been a global comparative analysis of working time laws policies and actual working hours Despite a century long optimism about reduced working hours and some progress in legal measures limiting working hours this book demonstrates that differences in actual working hours between industrialized and developing countries remain considerable without any clear sign of hours being reduced This study aims to offer some suggestions about how this gap can begin to be closed most basic questions facing planning theory and practice today The author argues that it is not plans that determine the shape of cities but political processes In the 1980s state planning came under siege planners had to justify their existence to politicians the business world and the public Though planning must still be accountable neither the complete domination of the market nor traditional post war planning ideologies are wholly acceptable in the 1990s A new agenda and a major rethinking of planning from first principles is required but what form should this take Showing that political theory provides the proper foundation for understanding planning practice the book explores in turn assenting and dissenting planning paradigms Exploration of the former begins with Weber and moves through pluralism corporatism and neo liberalism Dissenting theory is organized around the work of Marx orthodox neo Marxism Gramsci s philosophy of praxis the critical theory of the Frankfurt School and the work of Habermas The author concludes with a presentation of an integrated political perspective upon planning and the state      *Long-range Planning in American Industry* Brian W.
