Data Assimilation for Atmospheric, Oceanic and Hydrologic Applications SEON KI PARK, Liang Xu, 2009-02-08 Data assimilation (DA) has been recognized as one of the core techniques for modern forecasting in various earth science disciplines including meteorology, oceanography and hydrology. Since early 1990s, DA has been an important session topic in many academic meetings organized by leading societies such as the American Meteorological Society, American Geophysical Union, European Geophysical Union, World Meteorological Organization, etc. Recently, the 2 Annual Meeting of the Asia-Oceania Geosciences Society (AOGS) held in Singapore in June 2005 conducted a session on DA under the title of Data Assimilation for Atmospheric, Oceanic and Hydrologic Applications. This first DA session in the 2 AOGS was a great success with more than 30 papers presented and many great ideas exchanged among scientists from the three different disciplines. The scientists who participated in the meeting suggested making the DA session a biennial event. Two years later, at the 4 AOGS Annual Meeting, Bangkok, Thailand, the DA session was officially named Sasaki Symposium on Data Assimilation for Atmospheric, Oceanic and Hydrologic Applications to honor Prof. Yoshi K. Sasaki of the University of Oklahoma for his life-long contributions to DA in geosciences.

Inorganic Chemistry James E. House, 2025-01-27 Inorganic Chemistry, Fourth Edition, provides essential information for students of inorganic chemistry and is updated throughout. The presentation of topics is made with an effort to be clear and concise so that the book is portable and user-friendly.
