Plant Glycobiology - a sweet world of lectins, glycoproteins, glycolipids and glycans Els J. M. Van Damme, Nausicaä Lannoo, Cécile Albenne, Elisabeth Jamet, 2015-02-12 Plants synthesize a wide variety of unique glycan structures which play essential roles during the life cycle of the plant Being omnipresent throughout the plant kingdom ranging from simple green algae to modern flowering plants glycans contribute to many diverse processes Glycans can function as structural components in the plant cell wall assist in the folding of nascent proteins act as signaling molecules in plant defense responses or ER stress pathways or serve within the energy metabolism of a plant In most cases glycans are attached to other macromolecules to form so called glycoconjugates e g glycoproteins proteoglycans and glycolipids but they can also be present as free entities residing in the plant cell Next to the broad complex set of glycans plants also evolved an elaborate collection of lectins or proteins with a lectin like domain which can recognize and bind to endogenous plants own or exogenous foreign glycans Though still poorly understood in plants the dynamic interactions between lectins and

carbohydrate structures are suggested to be involved in gene transcription protein folding protein transport cell adhesion signaling as well as defense responses As such a complex and largely undetermined glycan interactome is established inside plant cells between cells and their surrounding matrix inside the extracellular matrix and even between organisms Studying the biological roles of plant glycans will enable to better understand plant development and physiology in order to fully exploit plants for food feed and production of pharmaceutical proteins In this Research Topic we want to provide a platform for articles describing the latest research perspectives and methodologies related to the fascinating world of plant glycobiology with a focus on following subjects 1 Identification and characterization of plant glycans their biosynthetic and degradation enzymes 2 Characterization of plant lectins and glycoproteins 3 Plant glycans in the plant s energy metabolism 4 Role of plant glycans in plant defense signaling 5 Use of plant lectins in pest control 6 Plant lectins as new tools in human medicine 7 Glyco engineering in plants

an important critical voice **Losing Eden** Lucy Jones, 2020-02-27 A TIMES AND TELEGRAPH BOOK OF THE YEAR
Beautifully written movingly told and meticulously researched a convincing plea for a wilder richer world Isabella Tree author of Wilding By the time I d read the first chapter I d resolved to take my son into the woods every afternoon over winter By the time I d read the sixth I was wanting to break prisoners out of cells and onto the mossy moors Losing Eden rigorously and convincingly tells of the value of the natural universe to our human hearts Amy Liptrot author of The Outrun Today many of us live indoor lives disconnected from the natural world as never before And yet nature remains deeply ingrained in our language culture and consciousness For centuries we have acted on an intuitive sense that we need communion with the wild to feel well Now in the moment of our great migration away from the rest of nature more and more scientific evidence is emerging to confirm its place at the heart of our psychological wellbeing So what happens asks acclaimed journalist Lucy Jones as we lose our bond with the natural world might we also be losing part of ourselves Delicately observed and rigorously researched Losing Eden is an enthralling journey through this new research exploring how and why connecting with the living world can so drastically affect our health Travelling from forest schools in East London to the Svalbard Global Seed Vault via primeval woodlands Californian laboratories and ecotherapists couches Jones takes us to the cutting edge of human biology neuroscience and psychology and discovers new ways of understanding our increasingly dysfunctional relationship with the earth Urgent and uplifting Losing Eden is a rallying cry for a wilder way of life for finding asylum in the soil and joy in the trees which might just help us to save the living planet as well as ourselves

Augmented Brett King, Andy Lark, Alex Lightman, JP Rangaswami, 2016-05-15 The Internet and smartphone are just the latest in a 250 year long cycle of disruption that has continuously changed the way we live the way we work and the way we interact The coming Augmented Age however promises a level of disruption behavioural shifts and changes that are unparalleled While consumers today are camping outside of an Apple store waiting to be one of the first to score a new Apple Watch or iPhone the next generation of wearables will be able to predict if we re likely to have a heart attack and recommend a course of action We watch news of Google s self driving cars but don t likely realise this means progressive cities will have to ban human drivers in the next decade because us humans are too risky Following on from the Industrial or machine age the space age and the digital age the Augmented Age will be based on four key disruptive themes Artificial Intelligence Experience Design Smart Infrastructure and HealthTech Historically the previous ages brought significant disruption and changes but on a net basis jobs were created wealth was enhanced and the health and security of society improved What will the Augmented Age bring Will robots take our jobs and AI s subsume us as inferior intelligences or will this usher in a new age of abundance Augmented is a book on future history but more than that it is a story about how you will live your life in a world that will change more in the next 20 years than it has in the last 250 years Are you ready to adapt Because if history proves anything you don t have much of a choice **Battery Management System for Future Electric Vehicles** Dirk
