navigate the choices that confront us all families singletons pensioners when making decisions about what to eat what to buy how to travel and how to keep warm in the era of climate change and economic turmoil He works out the sums and lets us know which choices will make the biggest difference and which are false savings His book is an irreverent but seriously rigorous reference guide to low cost low carbon living for everyone in any location in tough times It s brimming with up to date information on current and future technologies tips and ideas for every budget on how to spend the least for the biggest carbon reduction gain and insight from the experiences of people trying to live low carbon lives **Motoring World 2018**
