Advanced Pre Med Studies Parent Lesson Planner:

Advanced Pre-Med Studies Parent Lesson Planner Master Books, 2013-08-01 This Advance Pre Med Studies contains materials for use with Exploring the History of Medicine The Genesis of Germs Body by Design and Building Blocks in Life Science Features Each suggested weekly schedule has three easy to manage lessons which combine reading worksheets and vocabulary building Designed to allow your student to be independent materials in this resource are divided by section so you can remove quizzes tests and answer keys before beginning the coursework As always you are encouraged to adjust the schedule and materials as you need to in order to best work within your educational program Workflow Students will read the pages in their book and then complete each worksheet Tests and quizzes are given at regular intervals with space to record each grade

Advanced Pre-Med Studies Parent Lesson Plan, 2013-08-01 Advanced Pre Med Studies Course Description Semester 1 From surgery to vaccines man has made great strides in the field of medicine Quality of life has improved dramatically in the last few decades alone and the future is bright But students must not forget that God provided humans with minds and resources to bring about these advances A biblical perspective of healing and the use of medicine provides the best foundation for treating diseases and injury In Exploring the History of Medicine author John Hudson Tiner reveals the spectacular discoveries that started with men and women who used their abilities to better mankind and give glory to God The fascinating history of medicine comes alive in this book providing students with a healthy dose of facts mini biographies and vintage illustrations It seems that a new and more terrible disease is touted on the news almost daily The spread of these scary diseases from bird flu to SARS to AIDS is a cause for concern and leads to questions such as Where did all these germs come from and how do they fit into a biblical world view What kind of function did these microbes have before the Fall Does antibiotic resistance in bacteria prove evolution How can something so small have such a huge deadly impact on the world around us Professor Alan Gillen sheds light on these and many other questions in The Genesis of Germs He shows how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view Dr Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ Semester 2 Body by Design defines the basic anatomy and physiology in each of 11 body systems from a creationist viewpoint Every chapter explores the wonder beauty and creation of the human body giving evidence for creation while exposing faulty evolutionist reasoning Special explorations into each body system look closely at disease aspects current events and discoveries while profiling the classic and contemporary scientists and physicians who have made remarkable breakthroughs in studies of the different areas of the human body Within Building Blocks in Life Science you will discover exceptional insights and clarity to patterns of order in living things including the promise of healing and new birth in Christ Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years The evolutionary worldview can be found filtered through every topic at every age level in

our society It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions This dynamic education resource helps young people not only learn science from a biblical perspective but also helps them know how to defend their faith in the process *Elementary World History - You Report! Parent Lesson Planner* ,2014-05-01

Elementary World History Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Big Book of History Learning just became big fun Unfold 15 feet of the most interesting history of the world This easy to follow color coded multi stream timeline teaches six thousand years of world history to children ages seven through thirteen Discover technology and inventions biblical and Christian history world events civilizations and empires These exciting facts and so much more wait inside who were the first emperors of China and Rome what discovery unlocked the secrets of a forgotten language how modern robotics had its roots in the tea dolls of Japan where Christians faced death for the entertainment of thousands why the languages of Greek and Hebrew were used to write the Bible and how the Age of Discovery meant wealth some and the destruction of civilization for others Understanding how the past has shaped our future will inspire young learners in a uniquely visual way to make history for themselves Noah s Ark Thinking Outside the Box book and DVD Could a ship be constructed that would be able to survive the global flood described in biblical book of Genesis Could it be built without the modern techniques of today being available to Noah This groundbreaking book and DVD set answers both of these questions with a resounding yes Join naval expert and mechanical engineer Tim Lovett in thinking outside the box as you consider critical research in this innovative study on Noah s ark Lovett builds on traditional research into this historic event using the latest techniques in computer modeling and testing Includes insight and context by pioneering creationist researcher Dr John Whitcomb Unveils a new ark design based on biblical information and shipbuilding principles Beautiful illustrations and photos reveal facets of design and construction techniques Animations interviews and images of the Ark explain the most perplexing questions Remaining faithful to the biblical dimensions Lovett s updated design similar to that of ancient sailing vessels is based on established principles in ship design and unique research He reveals a feasible ark design explores the impact of flood waters on the vessel and provides remarkable insight and analysis into the skills and techniques needed to construct it Look inside the ship that saved Noah and his family as well as the animal kinds

Concepts of Earth Science & Chemistry Parent Lesson Plan John Hudson Tiner,2013-08-26

Concepts of Earth and Chemistry Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Earth Blending a creationism perspective of history with definitions of terms and identification of famous explorers scientists etc this book gives students an excellent initial knowledge of people and places encouraging them to continue their studies in depth

Semester 2 Chemistry Chemistry is an amazing branch of science that affects us every day yet few people realize it or even give it much thought Without chemistry there would be nothing made of plastic there would be no rubber tires no tin cans no televisions no microwave ovens or something as simple as wax paper This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries of discoverers Find out why pure gold is not used for jewelry or coins Join Humphry Davy as he made many chemical discoveries and learn how they shortened his life See how people in the 1870s could jump over the top of the Washington Monument Exploring the World of Chemistry brings science to life and is a wonderful learning tool with many illustrations and biographical information

American History - Teacher Guide James P. Stobaugh, 2012-03-01 This convenient teacher's guide is all a parent or teacher needs to easily grade the 10th grade student assignments for American History Observations Assessments from Early Settlement to Today Assignments with answers learning objectives grading criteria and short essay questions are included This course is designed for a student to practice independent learning The guide will assist teachers by offering 34 chapters for 34 weeks of study Chapters include 5 lessons taking approximately 30 minutes each The final lesson of the week is an exam covering the week's instruction Student questions are organized in the back for easy use in testing and review Teachers parents or students can grade assignments daily or weekly As the teacher you will enjoy partnering with your student as he or she processes American history while developing or strengthening a Christian world view **Applied Science: Studies of God's Design in Nature Parent Lesson Planner**, 2014-03-01 Applied Science Studies of God's Design in Nature Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Made in Heaven Science shamelessly steals from God's creation yet refuses to give God the glory Discover how the glow of a cat's eyes innovates road reflectors the naturally sticky inspirations for Velcro and barbed wire as well as a fly's ear the lizard's foot the moth's eye and other natural examples are inspiring improvements and new technologies in our lives Engineers and inventors have long examined God's creation to understand and copy complex proven mechanics of design in the science known as biomimicry Much of this inspiration is increasingly drawn from amazing aspects of nature including insects to plants to man in search of wisdom and insight We are surrounded daily by scientific advancements that have become everyday items simply because man is copying from God's incredible creation without acknowledging the Creator Champions of Invention The great minds of the past are still with us today in many ways Individuals who explored the natural world hundreds and thousands of years ago have given us a treasure of knowledge in all the sciences In this exciting series from educator author John Hudson Tiner short biographies of the world's most gifted thinkers will inspire the leaders of tomorrow Study the life of the forgotten inventor Joseph Henry whose exploration of electricity set the standard for later innovators Find out how a personal tragedy paved the way for

Samuel F B Morse to put aside his painting and develop the telegraph These valuable learning guides will give students accurate accounts of lives from the halls of science and explain what those scientists believed about the world around them

Discovery of Design From the frontiers of scientific discovery researchers are now taking design elements from the natural world and creating extraordinary breakthroughs that benefit our health our quality of life and our ability to communicate and even help us work more efficiently An exciting look at cutting edge scientific advances Discovery of Design highlights incredible examples that include How things like batteries human organ repair microlenses automotive engineering paint and even credit card security all have links to natural designs Innovations like solar panels in space unfurled using technology gleaned from beech tree leaves and optic research rooted in the photonic properties of opal gemstones Current and future research from the fields of stealth technology communications cosmetics nanotechnology surveillance and more Take a fantastic journey into the intersection of science and God s blueprints for life discovering answers to some of the most intricate challenges we face in a multi purpose educational supplement

Survey of Science Specialties Parent Lesson Plan
,2013-08-01

Survey of Science Specialities Course Description This is the suggested course sequence that allows two core areas of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials within each semester are independent of one another to allow flexibility

Quarter 1 Archaeology The Archaeology Book takes you on an exciting exploration of history and ancient cultures You will learn both the techniques of the archaeologist and the accounts of some of the richest discoveries of the Middle East that demonstrate the accuracy and historicity of the Bible You will unearth how archaeologists know what life was like in the past why broken pottery can tell more than gold or treasure can some of the difficulties in dating ancient artifacts how the brilliance of ancient cultures demonstrates God s creation history of ancient cultures including the Hittites Babylonians and Egyptians the early development of the alphabet and its impact on discovery the numerous archaeological finds that confirm biblical history

Quarter 2 Geology The Geology Book will teach what really carved the Grand Canyon how thick the Earth s crust is why the Earth is unique for life the varied features of the Earth s surface from plains to peaks how sedimentary deposition occurs through water wind and ice effects of erosion ways in which sediments become sedimentary rock fossilization and the age of the dinosaurs the powerful effects of volcanic activity continental drift theory radioisotope and carbon dating geologic processes of the past Our planet is a most suitable home Its practical benefits are also enhanced by the sheer beauty of rolling hills solitary plains churning seas and rivers and majestic mountains all set in place by processes that are relevant to today s entire population of this spinning rock we call home

Quarter 3 Cave Explore deep into the hidden wonders beneath the surface as cave expert Dr Emil Silvestru takes you on an illuminating and educational journey through the mysterious world of caves Discover the beautiful thriving ecology unique animals and fragile balance of this little seen ecosystem in caves from around the globe The Cave Book will teach you about a creationary model for how caves form a history of how

caves have been used by humans for shelter and worship how old caves really are the surprising world of Neanderthals and their connection to modern humans how to make a stone axe and about early tools just how long it really takes for cave formations to form unusual animals that make caves their home examples of how connected caves are to mythology of many cultures the climate and geologic processes and features of caves and karst rocks the process by which ice caves form exploration hazards and record setting caves how caves form and features above and below the surface Quarter 4 Fossil Fossils have fascinated humans for centuries But where did they come from and how long have they been around These and many other questions are answered in this remarkable book The Fossil Book will teach you about the origin of fossils how to start your own fossil collection what kinds of fossils can be commonly found the age of fossils how scientists find and preserve fossils how to identify kinds of fossils how the Flood affected fossil formation the Geologic Column Diagram the difference between evolutionists and creationists views on fossils the four Cs of biblical creation the different kinds of rocks fossils are found in coal and oil formation Learning about fossils their origins and how to collect them can be both fun and educational

Parent Lesson Plan, 2013-08-01 Science Starters Elementary Chemistry and Physics Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Chemistry Investigate the Possibilities Elementary Chemistry Matter Its Properties Its Changes Infused with fun through activities and applied learning this dynamic full color book provides over 20 great ways to learn about bubbles water colors salt and the periodic table all through interactive lessons that ground students in their faith in God Help tap into the natural curiosity of young learners with activities utilizing common household items teaching them why and how things work what things are made of and where they came from Students will learn about the physical properties of chemical substances why adding heat causes most chemical changes to react faster the scientist who organized a chart of the known elements the difference between chemical changes and physical changes Semester 2 Physics Investigate the Possibilities Elementary Physics Energy Its Forms Changes Function This remarkable full color book is filled with experiments and hands on activities helping 3rd to 6th graders learn how and why magnets work different kinds of energy from wind to waves and concepts from nuclear power to solar energy Science comes alive as students are guided through simplified key concepts of elementary physics and through hands on applications Students will discover what happens to light waves when we see different colors how you can see an invisible magnetic field the essential parts of an electric circuit how solar energy can be changed into electric energy Investigate the wonderful world God has made with science that is both exciting and educationally outstanding in this comprehensive series

Life Science: Origins & Scientific Theory Parent Lesson Plan

,2013-08-01 How to use this lesson planner This course is intended to help a student assess information about evolution and creation and based on the information provided for each form his or her own understanding of this issue The author spent 30 years in a challenge to prove evolution yet the more he learned the more the truth of God's Word became apparent in the evidence and interviews he found while travelling the world speaking to scholars museum officials and viewing artifacts While originally designed for classroom use this course represents substantial value and flexibility for those who choose to home educate The content and organization of the teacher manual means that this course can be used by more than one student at a time or even multiple times for a single student without reusing course testing materials Chapter Objectives These are presented in a way that is perfect for students to answer in a notebook having students copy the question and then answer in the notebook is even more helpful by putting the question and answer in proximity and context These notes in combination with the chapter tests are excellent resources for preparing for sectional tests if given or a final exam at the end Chapter objective can be shared with a student or students and then kept in a binder for future use if needed Students are

also encouraged to keep these questions and answers for pre test studying Chapter Exams For each chapter an A B and C test is provided in the teacher s manual Here is how you can extend your use of this material Option 1 You can follow the instructions in the book which are designed for one student Or you can modify one of the following options for your student and still have enough course materials to use the course multiple times Option 2 You could have up to three students taking the course at the same time with each student having different tests if you assign each Test A to one student Test B to another and Test C to a third This insures each student has a different test and educators can better assess each student s individual understanding of the material at each point Alternate sectional and final exams are included in this manual for your convenience Option 3 Adjust the testing and materials to your educational program For example each chapter test could be used as additional worksheet material for one or more students with only the included sectional exams to be administered Or even just use a final exam for testing comprehension of material if you wish to assign several essays project or a term paper based on individual questions of your choice from the exams and objectives or based on a chapter topic This option would allow for additional writing and research opportunities and for some students while engaging them more fully in comprehension and application of knowledge for this educational material Sectional Exams If used for a single student a combination of B tests from the teacher s manual form the basis of a sectional exam Alternate sectional exams are included in this package to give you added flexibility in using this course per your own educational program needs whether are teaching one or multiple students at one time or for future use Final Exam C tests form a 190 page final exam if you are using the book per its instructions If you are choosing one of the alternate options discussed you will find an alternate final exam in this packet for your convenience
