Advances In Experimental Philosophy Of Mind:

Advances in Experimental Philosophy of Mind Justin Sytsma, 2014-03-27 The past decade has witnessed an exciting and controversial new approach to philosophy. Experimental philosophers aim to supplement and perhaps to supplant traditional philosophical approaches by employing empirical methods from the social sciences. In *Advances in Experimental Philosophy of Mind*, leading experimental philosophers apply these methods to questions about the nature of the mind, the self, consciousness, moral judgment, and concepts. By bringing empirical methods to bear on key issues, *Advances in Experimental Philosophy of Mind* pushes the debates forward, casting new insight on perennial problems. This is an essential resource for professors, graduate students, and advanced undergraduates interested in either philosophy of mind or the burgeoning field of experimental philosophy.

Methodological Advances in Experimental Philosophy Eugen Fischer, Mark Curtis, 2019-03-21 Until recently, experimental philosophy has been associated with the questionnaire-based study of intuitions. This volume brings together established and emerging research leaders from several areas of experimental philosophy to explore how new empirical methods from the behavioural sciences and digital humanities can contribute to philosophical debates. Each chapter offers an accessible overview of these exciting innovations, demonstrating their application in a key area of philosophy and discussing their strengths and limitations. Methods covered include eye tracking, virtual reality technology, neuroimaging, statistical learning, and experimental economics, as well as corpus linguistics, visualisation techniques, and data and text mining. The volume explores their use in moral philosophy and moral psychology, epistemology, philosophy of science, metaphysics, philosophy of language, philosophy of mind, and the history of ideas. *Methodological Advances in Experimental Philosophy* is essential reading for undergraduates, graduate students, and researchers working in experimental philosophy.

A Companion to Experimental Philosophy Justin Sytsma, Wesley Buckwalter, 2016-03-28 This is a comprehensive collection of essays that explores cutting-edge work in experimental philosophy, a radical new movement that applies quantitative and empirical methods to traditional topics of philosophical inquiry. It situates the discipline within Western philosophy and then surveys the work of experimental philosophers by sub-discipline. It contains insights for a diverse range of fields, including linguistics, cognitive science, anthropology, economics, and psychology, as well as almost every area of professional philosophy today. Edited by two rising scholars who take a broad and inclusive approach to the field, it offers a complete introduction for non-specialists and students to the central approaches, findings, challenges, and controversies in experimental philosophy.

Current Controversies in Experimental Philosophy Edouard Machery, Elizabeth O'Neill, 2014-02-24 Experimental philosophy is one of the most active and exciting areas in philosophy today. In *Current Controversies in Experimental Philosophy*, Elizabeth O'Neill and Edouard Machery have brought together twelve leading philosophers to debate four topics central to recent research in experimental philosophy. The result is an important and enticing contribution to contemporary philosophy which thoroughly reframes traditional philosophical

questions in light of experimental philosophers use of empirical research methods and brings to light the lively debates within experimental philosophers intellectual community Two papers are dedicated to the following four topics Language Edouard Machery Genoveva Mart Consciousness Brian Fiala Adam Arico and Shaun Nichols Justin Sytsma Free Will and Responsibility Joshua Knobe Eddy Nahmias and Morgan Thompson Epistemology and the Reliability of Intuitions Kenneth Boyd and Jennifer Nagel Joshua Alexander and Jonathan Weinberg Preliminary descriptions of each chapter annotated bibliographies for each controversy and a supplemental guide to further controversies in experimental philosophy with bibliographies help provide clearer and richer views of these live controversies for all readers

Experimental Philosophy for Beginners Stephan Kornmesser, Alexander Max Bauer, Mark Alfano, Aurélien Allard, Lucien Baumgartner, Florian Cova, Paul Engelhardt, Eugen Fischer, Henrike Meyer, Kevin Reuter, Justin Sytsma, Kyle Thompson, Marc Wyszynski, 2024-08-30 This graduate textbook provides a basic introduction to experimental philosophy x phi In nine chapters different methods and tools used in X Phi are explained spanning quantitative vignette studies interactive experiments corpus analysis psycholinguistic experiments as well as qualitative interview studies Each chapter introduces a specific experimental method by means of a case study in an easily accessible way and covers the whole research process from the development of a research question to the interpretation of the data

Advances in Experimental Philosophy of Action Paul Henne, Samuel Murray, 2023-04-20 What is self control Does a person need to be conscious to act Are delusions always irrational Questions such as these are fundamental for investigations into action and rationality as well as how we assign responsibility for wrongdoing and assess clinical symptoms Bridging the gap between philosophy and psychology this interdisciplinary collection showcases how empirical research informs and enriches core questions in the philosophy of action Exploring issues such as truth moral judgement agency consciousness and cognitive control chapters offer an overview of the current state of research present new empirical findings and identify where future experimental work can further advance the frontier between philosophy and psychology This is an essential resource for anyone looking to better understand how science and philosophy can meaningfully inform our knowledge of human agency

The Compact Compendium of Experimental Philosophy Alexander Max Bauer, Stephan Kornmesser, 2023-11-20 The relatively new movement of Experimental Philosophy applies different systematic experimental methods to further illuminate classical philosophical issues This book brings together experts from the field to give the reader a compact yet extensive overview offering a ready at hand introduction to the state of the art

Advances in Experimental Philosophy of Language Jussi Haukioja, James R. Beebe, Justin Sytsma, 2016-11-17 Should philosophy of language use experimental methods or can it be pursued in the armchair Advances in Experimental Philosophy of Language represents a balanced variety of positions on this extensively discussed question In the first collection of its kind leading experts in the field present a number of different perspectives on the relevance of experimental methods in philosophy of language ranging from complete dismissals of traditional methods to defences of

armchair approaches As well as exploring possible novel experimental techniques Advances in Experimental Philosophy of Language evaluates the philosophical relevance of existing experimental results and presents new data from new experimental studies For scholars looking to stay ahead of the latest developments and trends in the philosophy of language this important contribution to the field brings the reader up to date Selfless Minds Monima Chadha, 2023 Selfless Minds offers a new interpretation of no self metaphysics in Vasubandhu's Abhidharmakosa Bhasya Monima Chadha reads Vasubandhu as defending not only eliminativism about self but also about persons and illusionism about the sense of self and all kinds of self representation This radical no self thesis presents several challenges for Abhidharma Buddhist philosophy of mind Even if we then grant that there is no self we are left with deeper questions about the sense of self or self representations implicated in our ordinary everyday experience and thought about the world and ourselves And if we grant that there are no persons questions remain about the status of our person related concerns and interpersonal practices Selfless Minds answers these questions on behalf of the Abhidharma Buddhist The first part of the book defends the hypothesis that we can salvage much of our experience and thought without implicating self representations The second part of the book examines the revisionary implications of the no person metaphysics Some of these seem unpalatable if not downright absurd This she argues give us reason to re evaluate both the Abhidharma metaphysics and our ordinary person related practices and concerns in light of each other by using some sort of wide reflective equilibrium Selfless Minds is a contribution to cross cultural philosophy that studies the nature of selfless minds from a place at the crossroads of different traditions and disciplines philosophy in the traditional Buddhist and contemporary Western traditions and contemporary cognitive sciences Advances in Experimental Philosophy and Philosophical Methodology Jennifer Nado, James R. Beebe, 2017-09-21 The rise of experimental philosophy is generating pressing methodological questions for philosophers Can findings from experimental studies hold any significance for philosophy as a discipline Can philosophical theorizing be improved through consideration of such studies Do these studies threaten traditional philosophical methodology Advances in Experimental Philosophy and Philosophical Methodology addresses these questions presenting a variety of views on the potential roles experimental philosophy might play in philosophical debate Featuring contributors from experimental philosophy as well as those who have expressed criticism of the experimental philosophy movement this volume reflects on the nature of philosophy itself its goals its methods and its possible future evolution Tackling two major themes contributors discuss the recent controversy over the degree to which intuition plays a major role in philosophical methodology and the characterization of the role of the experimental philosophy project They also look at the relationship between so called positive and negative projects and examine possible links between experimental and mainstream philosophical problems Close discussion of these themes contributes to the overall goal of the volume an investigation into the current significance and possible future applications of experimental work in philosophy Advances in Neurophilosophy Nora

Heinzelmann,2024-02-22 Bringing together recent case studies and insights into current developments this collection introduces philosophers to a range of experimental methods from neuroscience Chapters provide a comprehensive survey of the discipline covering neuroimaging such as EEG and MRI causal interventions like brain stimulation advanced statistical methods and approaches drawing on research into the development of human individuals and humankind A team of experts combine clear explanations of complex methods with reports of cutting edge research advancing our understanding of how these tools can be applied to further philosophical inquiries into agency emotions enhancement perception personhood and more With contributions organised by neuroscientific method this volume provides an accessible overview for students and scholars coming to neurophilosophy for the first time presenting a range of topics from responsibility to metacognition

The Implicit Mind Michael S. Brownstein,2018 The central contention of *The Implicit Mind* is that understanding the two faces of spontaneity its virtues and vices requires understanding the implicit mind In turn Michael Brownstein maintains that understanding the implicit mind requires the consideration of three sets of questions First what are implicit mental states What kind of cognitive structure do they have Second how should we relate to our implicit attitudes Are we responsible for them Third how can we improve the ethics of our implicit minds

Experimental Philosophy of Language: Perspectives, Methods, and Prospects David Bordonaba-Plou,2023-06-16 This book presents the current state of experimental philosophy of language drawing attention to corpus methods The volume highlights new trends in experimental philosophy of language thus exploring the future s discipline It includes cross linguistics studies that reveal the differences and similarities in how speakers of different languages use specific terms and scrutinizes methodological advances used in experimental philosophy of language The book also includes politically engaged experimental philosophy of language studies focusing on slurs pejoratives and hate speech The topic s interdisciplinary nature makes the volume of interest to a broad range of scholars across disciplines including philosophy linguistics philology psychology and computational linguistics
