Advances In Generative Lexicon Theory Text Speech And Language Technology:

Advances in Generative Lexicon Theory James Pustejovsky, Pierrette Bouillon, Hitoshi Isahara, Kyoko Kanzaki, Chungmin Lee, 2012-12-18 This collection of papers takes linguists to the leading edge of techniques in generative lexicon theory the linguistic composition methodology that arose from the imperative to provide a compositional semantics for the contextual modifications in meaning that emerge in real linguistic usage Today's growing shift towards distributed compositional analyses evinces the applicability of GL theory and the contributions to this volume presented at three international workshops GL 2003 GL 2005 and GL 2007 address the relationship between compositionality in language and the mechanisms of selection in grammar that are necessary to maintain this property The core unresolved issues in compositionality relating to the interpretation of context and the mechanisms of selection are treated from varying perspectives within GL theory including its basic theoretical mechanisms and its analytical viewpoint on linguistic phenomena

The Cambridge Handbook of Role and Reference Grammar Delia Bentley, Ricardo Mairal Usón, Wataru Nakamura, Robert D. Van Valin, Jr, 2023-06-07 Role and Reference Grammar RRG is a theory of language in which linguistic structures are accounted for in terms of the interplay of discourse semantics and syntax With contributions from a team of leading scholars this Handbook provides a field defining overview of RRG Assuming no prior knowledge it introduces the framework step by step and includes a pedagogical guide for instructors It features in depth discussions of syntax morphology and lexical semantics including treatments of lexical and grammatical categories the syntax of simple clauses and complex sentences and how the linking of syntax with semantics and discourse works in each of these domains It illustrates RRG's contribution to the study of language acquisition language change and processing computational linguistics and neurolinguistics and also contains five grammatical sketches which show how RRG analyses work in practice Comprehensive yet accessible it is essential reading for anyone who is interested in how grammar interfaces with meaning

Paul's Language of Ζῆλος Benjamin J. Lappenga, 2015-09-29 In Paul's Language of Benjamin Lappenga harnesses linguistic insights recently formulated within the framework of relevance theory to argue that within the letters of Paul specifically Galatians 1 2 Corinthians and Romans the word group is monosemic Linking the responsible treatment of lexemes in the interpretive process with new insight into Paul's rhetorical and theological task Lappenga demonstrates that the mental encyclopedia activated by the term is shaped within Paul's discourse and thus transforms the meaning of for attentive model readers Such identity forming strategies promote a series of practices that may be grouped under the rubric of rightly directed specifically emulation of weak people and things eager pursuit of community building gifts and the avoidance of jealous rivalry

African languages from a Role and Reference Grammar perspective Jens Fleischhauer, Claudius Patrick Kihara, 2023-05-08 The volume is a collection of papers which apply Role Reference Grammar RRG to African languages RRG is a functional theory of syntax which has been developed on the basis of two leading

questions First how would a syntactic theory look like which starts from exotic languages rather than English Second how can the interaction between syntax semantics and pragmatics in different grammatical systems best modelled and explained Although RRG took linguistic diversity serious from its very beginning African languages have been underrepresented in the development of the theory Given the sheer number African languages deserve a wider coverage in a syntactic theory which takes linguistic diversity seriously The volume is intended to fill this gap and comprises a selection of papers which investigate different aspects related to the syntax semantics pragmatics interface of different African languages This includes argument doubling and dislocation in isiZulu complex referential phrases in G k y serial verb constructions in Igbo locative complements in Hausa and Zarma Chiine and focus constructions in Emai The papers will extend the current RRG approach to new languages and phenomena

Word Prominence in Languages with Complex Morphologies Ksenia Bogomolets, Harry van der Hulst, 2023 This book focuses on the theoretical and analytical challenges that languages with complex morphologies pose for the theory and typology of word level prosodic phenomena The first three chapters explore general theoretical issues while later chapters offer a series of case studies from a range of genetically and geographically diverse languages

Argument Structure in Flux Elly van Gelderen, Jóhanna Barðdal, Michela Cennamo, 2013-06-15 The present volume is centered around five linguistic themes argument structure and encoding strategies argument structure and verb classes unexpressed arguments split intransitivity and existential and presentational constructions The articles also cover a variety of typologically different languages and they offer new data from under researched languages on the issues of event and argument structure In some cases novel perspectives from widely discussed languages on highly debated topics are offered also addressing more theoretical aspects concerning the predictability and derivation of linking Several contributions apply current models of the lexicon syntax interface to synchronic data Other contributions focus on diachrony and are based on extensive use of corpora Yet others although empirically and theoretically grounded privilege a methodological discussion presenting analyses based on thorough and long standing fieldwork

Advances in Natural Language Processing Aarne Ranta, Bengt Nordström, 2008-08-28 This book constitutes the refereed proceedings of the 6th International Conference on Natural Language Processing GoTAL 2008 Gothenburg Sweden August 2008 The 44 revised full papers presented together with 3 invited talks were carefully reviewed and selected from 107 submissions The papers address all current issues in computational linguistics and monolingual and multilingual intelligent language processing theory methods and applications

Argument Realisation in Complex Predicates and Complex Events Brian Nolan, Elke Diedrichsen, 2017-01-26 This book offers a comprehensive investigative study of argument realisation in complex predicates and complex events at the syntax semantic interface across a wide variety of the world s languages ranging over languages such as German Irish Sicilian and Italian Lithuanian Estonian and other Finno Ugric languages Pitjantjatjara Yankunytjatjara and Ngaanyatjarra from Australia s Western Desert region Japanese Tepehua Totonacan Mexico Cheyenne Mexican Spanish

Boharic Coptic and Persian This volume examines the syntactic variation of complex events complex predicates and multi verb constructions within a single clause where the clause is view as representing a single event studying their semantics and syntax within functional cognitive and constructional frameworks to arrive at a better understanding of their cross linguistic behaviour and how they resonate in syntax These constructions manifest considerable variability in cross linguistic comparisons of complex predicate formation In European languages for example typically one of the verbs in a verb verb construction highlights a phase of an underspecified event while the matrix verb specifies the actual event In contrast serial verbs require each verb to provide a sub event dimension within a complex event that is viewed holistically as unitary in syntax This book contributes to an understanding of complex events complex predicates and multi verb constructions across languages their syntactic constructional patterns and argument realisation

Recent Advances in Natural Language Processing II Nicolas Nicolov,Ruslan Mitkov,2000 This volume brings together revised versions of a selection of papers presented at the Second International Conference on Recent Advances in Natural Language Processing RANLP 97 held in Tzigov Chark Bulgaria September 1997 The aim of the conference was to give researchers the opportunity to present new results in Natural Language Processing NLP based both on traditional and modern theories and approaches The conference received substantial interest 167 submissions from more than 20 countries The best papers from the proceedings were selected for this volume in the hope that they reflect the most significant and promising trends and successful results in NLP

Context in Communication: A Cognitive View Gabriella Airenti, Marco Cruciani, Alessio Plebe, 2017-04-03 Context is what contributes to interpret a communicative act beyond the spoken words It provides information essential to clarify the intentions of a speaker and thus to identify the actual meaning of an utterance A large amount of research in Pragmatics has shown how wide ranging and multifaceted this concept can be Context spans from the

preceding words in a conversation to the general knowledge that the interlocutors supposedly share from the perceived environment to features and traits that the participants in a dialogue attribute to each other This last category is also very broad since it includes mental and emotional states together with culturally constructed knowledge such as the reciprocal identification of social roles and positions The assumption of a cognitive point of view brings to the foreground a number of new questions regarding how information about the context is organized in the mind and how this kind of knowledge is used in specific communicative situations A related very important question concerns the role played in this process by theory of mind abilities ToM both in typical and atypical populations In this Research Topic we bring together articles that address different aspects of context analysis from theoretical and empirical perspectives integrating knowledge and methods derived from Philosophy of language Linguistics Cognitive Science Cognitive Neuroscience Developmental and Clinical Psychology

The Routledge Companion to Linguistics in India Hemalatha Nagarajan, 2022-10-20 This companion offers a unique introductory study of linguistics in India Well supplemented with sample problems and linguistic puzzles to bolster analytical skills and logical reasoning it promotes a unique inquiry based approach to learning linguistics The volume looks at all the major subdisciplines of linguistics including phonetics phonology morphology semantics syntax and the interdisciplinary domains of psycholinguistics and neurolinguistics It provides a wealth of data not only from many Indian languages belonging to the primary language families present in the country Indo Aryan Dravidian Austro Asiatic and Tibeto Burman but also from the endangered languages of the Tai Kadai family of Assam and the Greater Andamanese family The author gives a holistic view of the linguistic landscape of India and fills a significant gap in the study of the lesser known languages of South Asia This volume will be an excellent resource for students and researchers of Indian languages cultural studies South Asian studies and all branches of linguistics
