The Next Phase in Heritage Language Studies: Methodological Considerations and Advancements Fatih Bayram, Maki Kubota, Sergio Miguel Pereira

Soares, 2024-03-27 Over the past three decades studies investigating heritage speaker HS linguistic competencies have shown time and again that despite being L1 or 2L1 native speakers of their home language s HS outcomes display variation across a wide spectrum of differences as compared to each other other types of bilinguals as well as their monolingual peers Studies have traditionally used mostly behavioral methodologies rooted in adjacent established fields e g L1 acquisition adult L2 acquisition offering in addition to documenting and describing HS performance important insights for linguistic theory and challenges related to home minority language maintenance contact policy and more A birds eye view makes it clear that the methodologies one uses to tap into HSs linguistic knowledge areas if not more are important than the phenomena under investigation especially in light of how their unique experiences with their heritage and other languages are present across a continuum

Information Highlighting in Advanced Learner English Marcus Callies, 2009 This book presents the first detailed and comprehensive study of information highlighting in advanced learner language echoing the increasing interest in questions of near native competence in SLA research and contributing to the description of advanced interlanguages It examines the production and comprehension of specific means of information highlighting in English by native speakers and German learners of English as a foreign language presenting triangulated experimental and learner corpus data as corroborating evidence The study focuses on learners use of discourse pragmatically motivated variations of the basic word order such as inversion preposing and it and wh clefts an underexplored field in SLA research to date The book also provides a critical re assessment of the study of pragmatics within SLA It has largely been neglected to date that L2 pragmatic knowledge includes more than the sociopragmatic and pragmalinguistic abilities for understanding and performing speech acts Thus the book argues for an extension of the scope of inquiry in interlanguage pragmatics beyond the cross cultural investigation of speech acts It also discusses pedagogical implications for foreign language teaching and will be of interest to applied linguists and SLA researchers language teachers and curriculum designers

Cognitive Aspects of Bilingualism

Istvan Kecskes, Liliana Albertazzi, 2007-08-19 A unique feature of this book is that chapters favor that line of cognitive linguistics which makes a clear distinction between real world and projected world Information conveyed by language must be about the projected world Both the experimental results and the systematic claims in this volume call for a weak form of whorfianism Also chapters add some relatively unexplored issues of bilingualism to the well known ones such as gender systems in the bilingual mind context and task synergic concepts blending the relationship between lexical categorization and ontological categorization among others

Learning a non-native language in a naturalistic environment: Insights from behavioural and neuroimaging research Christos Pliatsikas, Vicky Chondrogianni, 2015-09-02 It is largely accepted in the relevant literature that successful learning of one or more non native languages is affected by a number of factors that are independent of the target language s per se these factors include the age of acquisition AoA of the target language s the type and amount of formal instruction the learners have received as well as the amount of language use that the learners demonstrate Recent experimental evidence suggests that one crucial factor for efficient native like performance in the non native language is the amount of naturalistic exposure or immersion that the learners receive to that language This can be broadly defined as the degree to which language learners use their non native language outside the classroom and for their day to day activities and usually presupposes that the learners live in an environment where their non native language is exclusively or mostly used Existing literature has suggested that linguistic immersion can be beneficial for lexical and semantic acquisition in a non native language as well as for non native morphological and syntactic processing More recent evidence has also suggested that naturalistic learning of a non native language can also have an impact on the patterns of brain activity underlying language processing as well as on the structure of brain regions that are involved expressed as changes in the grey matter structure This Research Topic brings together studies on the effects of learning and speaking a non native language in a naturalistic environment These include more efficient or native like processing in behavioural tasks tapping on language lexicon morphology syntax as well as changes in the brain structure and function as revealed by neuroimaging studies

Non-Native Language Teachers Enric Llurda, 2006-06-09 As non natives are increasingly found teaching languages particularly English both in ESL and EFL contexts the identification of their specific contributions and their main strengths has become more relevant than ever This volume provides different approaches to the study of non native teachers NNS teachers as seen by students teachers graduate supervisors and by themselves It contributes seldom explored perspectives like classroom discourse analysis and social psychological framework to discuss conceptions of NNS teachers

Handbook of Bilingualism Judith F. Kroll, A. M. B. de Groot, 2009 How is language acquired when infants are exposed to multiple language input from birth and when adults are required to learn a second language after early childhood How do adult bilinguals comprehend and produce words and sentences when their two languages are potentially always active and in competition with one another What are the neural mechanisms that underlie proficient

bilingualism What are the general consequences of bilingualism for cognition and for language and thought This handbook will be essential reading for cognitive psychologists linguists applied linguists and educators who wish to better understand the cognitive basis of bilingualism and the logic of experimental and formal approaches to language science Incomplete Acquisition in Bilingualism Silvina A. Montrul, 2008-09-17 Age effects have played a particularly prominent role in some theoretical perspectives on second language acquisition This book takes an entirely new perspective on this issue by re examining these theories in light of the existence of apparently similar non native outcomes in adult heritage speakers who unlike adult second language learners acquired two or more languages in childhood Despite having been exposed to their family language early in life many of these speakers never fully acquire or later lose aspects of their first language sometime in childhood The book examines the structural characteristics of incomplete grammatical states and highlights how age of acquisition is related to the type of linguistic knowledge and behavior that emerges in L1 and L2 acquisition under different environmental circumstances By underscoring age of acquisition as a unifying factor in the study of L2 acquisition and L1 attrition it is claimed that just as there are age effects in L2 acquisition there are also age effects or even perhaps a critical period in L1 attrition The book covers adult L2 acquisition attrition in adults and in children and includes a comparison of adult heritage language speakers and second language learners An Introductory Reader to the Writings of Jim Cummins Jim Cummins, Colin Baker, Nancy H. Hornberger, 2001 The contribution of Jim Cummins to bilingualism and bilingual education has been substantial and profound This reader provides a comprehensive compilation of his most important and influential texts The book also provides a detailed biographical introduction and a commentary on the growth of ideas over three decades Lexicography in the Borderland Between Knowledge and Non-knowledge Sven Tarp, 2008 The book contains a state of the art summary of the theoretical discussions within the field of lexicography during the last decades On this basis it presents and argues for a new general theory called the function theory It goes on to develop this theory in one single field i e learners lexicography where it both formulates the basic elements of a general theory for learners dictionaries as well as a number of specific theories for special subfields such as selection meaning semantic relations morphology syntactic properties and word combinations It contains a big number of examples extracted from existing dictionaries which are discussed from the point of view of the theories formulated Cognate Vocabulary in Language Acquisition and Use Agnieszka Otwinowska, 2016 This book brings together linguistic psycholinguistic and educational perspectives on the phenomenon of cognate vocabulary across languages It discusses extensive qualitative and quantitative data on Polish English cognates and their use by learners users of English to show the importance of cognates in language acquisition and learning **Childhood Bilingualism** Peggy D. McCardle, Erika Hoff, 2006-01-01 This book contains reports of research on bilingualism in infants and children as well as perspectives from those involved in cross linguistic research on language development literacy development in bilingual children and psycholinguistic research on bilingualism in adults It offers a

fresh multidisciplinary perspective and next steps for research on childhood bilingualism The Language of the Skies
Sandford F. Borins, Institute of Public Administration of Canada, 1983 The Language of the Skies chronicles one of the most
bitter crises in French English relations in Canada the bilingual air traffic control conflict which arose in the mid 1970s when
francophone controllers and pilots attempted to use French as well as English in Quebec aviation
