**Advances in Automatic Text Summarization** Inderjeet Mani, Mark T. Maybury, 1999 Until now there has been no state of the art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. With the rapid growth of the World Wide Web and electronic information services, information is becoming available on line at an incredible rate. One result is the oft-decried information overload. No one has time to read everything yet we often have to make critical decisions based on what we are able to assimilate. The technology of automatic text summarization is becoming indispensable for dealing with this problem. Text summarization is the process of distilling the most important information from a source to produce an abridged version for a particular user or task. Until now there has been no state of the art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. The book is organized into six sections: Classical Approaches, Corpus Based Approaches, Exploiting Discourse Structure, Knowledge Rich Approaches, Evaluation Methods, and New Summarization Problem Areas. Contributors: D A Adams, C Aone, R Barzilay, E Bloedorn, B Boguraev, R Brandow, C Buckley, F Chen, M J Chrzanowski, H P Edmundson, M Elhadad, T Firmin, R P Futrelle, J Gollins, U Hahn, E Hovy, D Jang, K Sparck Jones, G M Kasper, C Kennedy, K Kukich, J Kupiec, B Larsen, W G Lehnert, C Lin, H P Luhn, I Mani, D Marcu, M Maybury, K McKeown, A Merlino, M Mitra, K Mitze, M Moens, A H Morris, S H Myaeng, M E Okun, J Pedersen, J J Pollock, D R Radev, G J Rath, L F Rau, U Reimer, A Resnick, J Robin, G Salton, T R Savage, A Singhal, G Stein, T Strzalkowski, S Teufel, J Wang, B Wise, A Zamora. *Advances in Automatic Text Summarization*

Inderjeet Mani, Mark T. Maybury, 1999 Natural Language Processing for Online Applications Peter Jackson, Isabelle Moulinier, 2007 This text covers the technologies of document retrieval, information extraction, and text categorization in a way which highlights commonalities in terms of both general principles and practical concerns. It assumes some mathematical background on the part of the reader but the chapters typically begin with a non-mathematical account of the key issues. Current research topics are covered only to the extent that they are informing current applications; detailed coverage of longer term research and more theoretical treatments should be sought elsewhere. There are many pointers at the ends of the chapters that the reader can follow to explore the literature. However, the book does maintain a strong emphasis on evaluation in every chapter, both in terms of methodology and the results of controlled experimentation.
