Advice For Future Fifth Graders:

More Everyday Science Mysteries: Stories for Inquiry-Based Science Teaching Richard Konicek-Moran, 2009-04 Through 15 mystery stories this book memorably illustrates science concepts for students and reinforces the value of learning science through inquiry. Each mystery presents opportunities for students to create questions, form hypotheses, test their ideas, and come up with explanations. Focused on concepts such as periodic motion, thermodynamics, temperature, and energy, and sound, these mysteries draw students into the stories by grounding them in experiences students are familiar with, providing them with a foundation for classroom discussion and inquiry.

Even More Everyday Science Mysteries Richard Konicek-Moran, 2010 What are the odds of a meteor hitting your house? What are warm clothes anyway? Do you get more sunlight from Daylight Saving Time? Everyone loves a good mystery, and these unfold in the 15 stories presented in *Even More Everyday Science Mysteries*, the third volume in author Richard Konicek-Moran's award-winning series. Again, the author uses stories without endings to teach a science principle, allowing the students to investigate how each story can be resolved. All the stories relate to the world around us and encourage students to take ownership of their learning. In *Here's the Crusher*, family members ponder what could have crushed a plastic soda bottle sitting on a table. By exploring each family member's idea, common misconceptions are uncovered and discussed. In *Florida Cars*, Amber seeks out the causes of rust on cars from Florida. She experiments with nails to try to discover what ingredients produce rust. Your students will tackle Amber's problem and reach their own conclusions. Science topics explored include evaporation, erosion, thermal energy, atmospheric pressure, buoyancy, and density. These stories are bound to reveal the wonderful ideas all students have, give them the confidence to explore their own thinking, and provide opportunities for them to do science rather than have science done to them. Page Keeley, NSTA President 2008-09.

Yet More Everyday Science Mysteries Richard Konicek-Moran, 2011 In the fourth book of this award-winning series, author Richard Konicek-Moran explores 15 new mysteries children and adults encounter in their daily lives. Relating the mysteries to experiences familiar to elementary and middle school students, the stories show how science is part of everyday life and initiate inquiry-based learning by leaving each mystery without an ending. Students identify the problem to be solved, formulate questions, form hypotheses, test their ideas, and come up with possible explanations.

Weekly Compilation of Presidential Documents, 1997 *Everyday Life Science Mysteries* Richard Konicek-Moran, 2013 How do tiny bugs get into oatmeal? What makes children look like or different from their parents? Where do rotten apples go after they fall off the tree? By presenting everyday mysteries like these, this book will motivate your students to carry out hands-on science investigations and actually care about the results. These 20 open-ended mysteries focus exclusively on biological science, including botany, human physiology, zoology, and health. The stories come with lists of science concepts to explore, grade-appropriate strategies for using them, and explanations of how the lessons align with national standards. They also relieve you of the tiring work of designing inquiry lessons from scratch. What makes this book so

special is the unique way science is integrated into the story line using characters and situations children can easily identify with Page Keeley author of the NSTA Press series Uncovering Student Ideas in Science **Everyday Earth and Space Science Mysteries** Richard Konicek-Moran,2013 What are the odds that a meteor will hit your house do you actually get more sunlight from Daylight Savings Time Where do puddles go By presenting everyday mysteries like these this book will motivate your students to carry out hands on science investigations and actually care about the results These 19 open ended mysteries focus exclusively on Earth and space science including astronomy energy climate and geology The stories come with lists of science concepts to explore grade appropriate strategies for using them and explanations of how the lessons align with national standards They also relieve you of the tiring work of designing inquiry lesson from scratch cover verso
