Advocating For Self Womens Decisions Concerning Contraception Haworth Innovations In Feminist Studies:

Advocating for Self Peggy Matteson, 1995 In *Advocating for Self* Peggy Matteson gives voice to women who describe the joys and concerns of many years of contraceptive use. The author held open ended interviews with 40 women who represent contraceptive use for a combined 310 years. These women reveal how when their contraceptive decisions are looked at as a way for women to advocate for themselves their choices become clearer and their chosen method of contraception more effective. Educators, health care providers and women about to choose a contraceptive method would do well to listen to how these women evaluated their contraceptive choices. They reveal much about choosing a contraceptive method especially how education and support is needed to make their choices work in real life. Some of the main topics they cover include the process of choosing to actually implement a contraceptive option, how women explore and choose a contraceptive option, women's personalizing of pregnancy risk, the ramifications of contraceptive use and how women deal with them, how women contend with use effectiveness. A variety of women, readers, nurses and counselors can find insight in *Advocating for Self* on decisions surrounding contraceptive use. Its unique focus is specifically suited for those women who are in the process of choosing a contraceptive method or those who may do so in the future. *Women, Families, and Feminist Politics* J Dianne Garner, Suzanne Cherrin, 2014-07-16 Women and their roles within families must be understood within the context of ethnic traditions, religion and culture. *Women, Families and Feminist Politics: A Global Exploration* combines all of these aspects to evaluate the similarities and differences of women around the world. Women's Best Friendships Patricia Rind, 2012-12-06 Explore the distinct relationships of close female friends Women's Best Friendships Beyond Betty Veronica Thelma and Louise gives new and comprehensive insight into the complex world of women's closest friendships Recent studies have shown that women place enormous value on best friendships and consider them to be woven tightly into the fabric of their lives Using in depth interviews along with close readings of relevant literature and theory this book focuses on the many facets of these relationships With heartfelt first person accounts and insightful commentary from the author this book examines three intertwining themes feelings of competition issues of dependence and independence and knowing understanding This book sheds light on areas of tension among women especially difficulties in communication frustration about not being entirely let into a friend's life and thought processes and the feeling that one friend may value the friendship more than the other It also discusses women's struggles to maintain closeness over increased distances and the realization that one's friends are flawed even as friends This informative book grounded in established research and theory presents stories of real friendships told by the people who live them These women talk candidly about what makes a best friend about navigating the choppy waters of friendship and much more Somehow when we started living farther apart there were ways in which we were being insensitive We recognized that there was a really strong bond but we were taking it for granted So we talked about how close we feel to one another and perhaps how that leads to some arguments or hurt feelings Liz on how distance has affected her relationship with her best friend Susan Em and I don't fight at all I don't know if that's good or bad I don't think I do well with fights I think that's probably a lot of conflict avoidance on my part And I think it does lead to some distance even though it's a best friendship I think I'm uncomfortable asserting myself And so it's easier not to have to do that So maybe my inability to deal with the problems keeps the friendship at a distance where it's safe and comfortable for me in that one respect Linda about her desire to avoid any confrontation with Emily her best friend Women's Best Friendships Beyond Betty Veronica Thelma and Louise is a fresh and exciting look at the inner workings of relationships between women Drawing upon a multitude of issues and insights this book is a must have for women's studies classes

Advocating for Self Peggy Matteson, 1995 Reports the results of the author's study of women's patterns of selection use and discontinuation of use of contraceptives

Transforming the Disciplines Renee P Prys, Mary Jane Cherry, Susan Popham, Elizabeth L Macnabb, 2013-10-31 A jargon free non technical and easily accessible introduction to women's studies All too many students enter academia with the hazy idea that the field of women's studies is restricted to housework birth control and Susan B Anthony Their first encounter with a women's studies textbook is likely to focus on the history and sociology of women's lives

While these topics are important the emphasis on them has led to neglect of equally important issues Transforming the Disciplines A Women s Studies Primer is one of the first women s studies textbooks to show feminist scholarship as an active force changing the way we study such diverse fields as architecture bioethics history mathematics religion and sports studies Although this text was designed as an introduction to women s studies it is also rewarding for upper level or graduate students who want to understand the pervasive effects of feminist theory Most chapters provide a bibliography or list of further reading of significant works Its clear jargon free prose makes feminist thought accessible to general readers without sacrificing the revolutionary power of its ideas In almost thirty essays covering a broad range of subjects from anthropology to chemistry to rhetoric Transforming the Disciplines exemplifies the changes achieved by feminist thought Transforming the Disciplines combines a high standard of writing and scholarship with personal insight includes both traditional academic arguments and alternative non agonistic forms of discussion embraces an international scope challenges traditional assumptions models and methodologies offers an inter and multidisciplinary approach strengthens readers understanding of the big picture not only for women but for all disempowered groups critiques feminism as well as patriarchal society Feminist theory is grounded in a questioning of traditional assumptions about what is right natural and self evident not just about the roles and nature of men and women but about how we think what we teach whose experience matters and what is important Transforming the Disciplines is the first textbook to show the consequences of those questions not the answers themselves but the consequences of the willingness to ask and the transformations that have occurred when the right answers changed
