Gitterman,2017-02-14 Modern presidents are CEOs with broad powers over the federal government The United States Constitution lays out three hypothetically equal branches of government the executive the legislative and the judicial but over the years the president as head of the executive branch has emerged as the usually dominant political and administrative force at the federal level In fact Daniel Gitterman tells us the president is effectively the CEO of an enormous federal bureaucracy Using the unique legal authority delegated by thousands of laws the ability to issue executive orders and the capacity to shape how federal agencies write and enforce rules the president calls the shots as to how the government is run on a daily basis Modern presidents have for example used the power of the purchaser to require federal contractors to pay a minimum wage and to prohibit contracting with companies and contractors that knowingly employ unauthorized alien workers Presidents and their staffs use specific tools including executive orders and memoranda to agency heads as instruments of control and influence over the government and the private sector For more than a century they have used these tools without violating the separation of powers *Calling the Shots* demonstrates how each of these executive powers is a powerful weapon of coercion and redistribution in the president's political and policymaking arsenal **The War Below: AS HEARD ON BBC RADIO 4 'TODAY'** Ernest Scheyder,2024-01-30 A FINANCIAL TIMES BOOK OF THE YEAR AN AMAZON BEST BOOK OF THE YEAR SO FAR FOR 2024 LONGLISTED FOR THE NATIONAL BOOK AWARD FOR

NONFICTION AND THE FT BUSINESS BOOK OF THE YEAR AWARD The trillion dollar battle for the resources to power our future Oil and gas defined the twentieth century Now lithium copper cobalt rare earths and nickel will define the twenty first The world is moving towards replacing fossil fuels with renewable energy But building electric vehicles solar panels and millions of other devices requires digging more mines Critical minerals are vital to many sustainable technologies and the competition for them is intensifying Nations which aspire to energy independence are ever more intertwined a hedge fund manager s attempt to revive rare earths mining in California needs Chinese expertise and international reliance on Africa s mining sector persists despite concern over child labour Meanwhile ecological dilemmas abound a proposed lithium mine in Nevada would help global car manufacturers slash their dependence on fossil fuels but developing that mine could cause the extinction of a flower found nowhere else on the planet As investors attempt to predict how the geopolitics of resource extraction will unfold this is a story of the industry giants researchers and policymakers at the forefront of the new energy wars

The Social Construction of Global Corruption Elitza Katzarova,2018-12-06 This book offers new ways of thinking about corruption by examining the two distinct ways in which policy approaches and discourse on corruption developed in the UN and the OECD One of these approaches extrapolated transnational bribery as the main form of corrupt practices and advocated a limited scope offense while the other approach tackled the broader structure of the global economic system and advocated curbing the increasing power of multinational corporations Developing nations in particular Chile initiated and contributed much to these early debates but the US sponsored issue of transnational bribery came to dominate the international agenda In the process the corrupt corporation was supplanted by the corrupt politician the corrupt public official and their international counterpart the corrupt country This book sheds light on these processes and the way in which they reconfigured our understanding of the state as an economic actor and the multinational corporation as a political actor
