In Search Of Ancient Astronomies McGraw Hill Paperbacks:

In search of ancient astronomies, 1976 *Monographic Series* Library of Congress, [African Cultural Astronomy](#) Jarita Holbrook, R. Thebe Medupe, Johnson O. Urama, 2008-01-01 This is the first scholarly collection of articles focused on the cultural astronomy of Africans. It weaves together astronomy, anthropology, and Africa, and it includes African myths and legends about the sky alignments to celestial bodies found at archaeological sites and at places of worship, rock art with celestial imagery, and scientific thinking revealed in local astronomy traditions including ethnomathematics and the creation of calendars. Authors include astronomers Kim Malville, Johnson Urama, and Thebe Medupe; archaeologist Felix Chami; and geographer Michael Bonine, and many new authors. As an emerging subfield of cultural astronomy, African cultural astronomy researchers are focused on training students specifically for doing research in Africa. The first part of the volume contains lessons and exercises to help the beginning student of African cultural astronomy. Included are exercises in archaeoastronomy, cultural anthropology, and naked eye astronomy, penned by authors who use these regularly in their research. This collection of lessons and research papers provides a foundation for the cultural astronomy researcher interested in doing work in Africa. *Skylore from Planet Earth: Stories from Around the World...* Dayle L. Brown, 2015-01-30 The starry night sky has always filled us with wonder. Down through the ages we have looked to the skies for guidance from the images of our heroes, gods, and monsters. Storytellers have illustrated their mythologies and legends with it passing on to future generations the customs of their people. Many of these stories have survived to the present. In this *Skylore from Planet Earth* we explore some of the stories about COMETS, the star cluster PLEIADES, our galaxy MILKY WAY, the planet VENUS, and this final book COMETS METEORS. [Library of Congress Catalogs](#) Library of Congress, 1980

Subject Catalog Library of Congress, **Subject Catalog, 1979** Library of Congress, 1979 **Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures** Helaine Selin, 1997-07-31 The *Encyclopaedia* fills a gap in both the history of science and in cultural studies. Reference works on other cultures tend either to omit science completely or pay little attention to it, and those on the history of science almost always start with the Greeks, with perhaps a mention of the Islamic world as a translator of Greek scientific works. The purpose of the *Encyclopaedia* is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures' science. Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas. The Western academic divisions of science, technology, and medicine have been united in the *Encyclopaedia* because in ancient cultures these disciplines were connected. This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity. The *Encyclopaedia* is the first compilation of this sort, and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today. There is nothing that crosses disciplinary and geographic boundaries, dealing with both scientific and philosophical issues to the extent that this work does.

locate them The author points out that not only did future masons such as Jefferson and Washington use this science as the basis of their designs for Monticello and Washington D C but the true motive of the expedition of Lewis and Clark was to identify the meridians mapped by the Templars and to search for the final resting place of Prince Henry Sinclair where the great Templar treasure could also be found *Echoes of the Ancient Skies* E.
