The 31 revised full papers presented were carefully reviewed and selected from 74 submissions. The papers are organized in topical sections on steganography and steganalysis, fingerprinting, watermarking attacks, watermarking security, watermarking of unconventional media, channel coding and watermarking theory and applications.     Coherent States, Wavelets, and Their Generalizations Syed Twareque Ali, Jean-Pierre Antoine, Jean-Pierre Gazeau, 2013-10-30 This second edition is fully updated covering in particular new types of coherent states, the so-called Gazeau-Klauder coherent states, nonlinear coherent states, squeezed states as used now routinely in quantum optics and various generalizations of wavelets, wavelets on manifolds, curvelets, shearlets, etc. In addition it contains a new chapter on coherent state quantization and the related probabilistic aspects. As a survey of the theory of coherent states, wavelets and some of their generalizations, it emphasizes mathematical principles subsuming the theories of both wavelets and coherent states into a single analytic structure. The approach allows the user to take a classical like view of quantum states in physics. Starting from the standard theory of coherent states over Lie groups, the authors generalize the formalism by associating coherent states to group representations that are square integrable over a homogeneous space; a further step allows one to dispense with the group context altogether. In this context wavelets can be generated from coherent states of the affine group of the real line and higher dimensional wavelets arise from coherent states of other groups. The unified background makes transparent an entire range of properties of wavelets and coherent states. Many concrete examples such as coherent states

from semisimple Lie groups Gazeau Klauder coherent states coherent states for the relativity groups and several kinds of wavelets are discussed in detail The book concludes with a palette of potential applications from the quantum physically oriented like the quantum classical transition or the construction of adequate states in quantum information to the most innovative techniques to be used in data processing Intended as an introduction to current research for graduate students and others entering the field the mathematical discussion is self contained With its extensive references to the research literature the first edition of the book is already a proven compendium for physicists and mathematicians active in the field and with full coverage of the latest theory and results the revised second edition is even more valuable     *Distributed Computing* Nancy A. Lynch,Alexander A. Shvartsman,2010-09 This book constitutes the refereed proceedings of the 24th International Symposium on Distributed Computing DISC 2010 held in Cambridge CT USA in September 2010 The 32 revised full papers selected from 135 submissions are presented together with 14 brief announcements of ongoing works all of them were carefully reviewed and selected for inclusion in the book The papers address all aspects of distributed computing and were organized in topical sections on transactions shared memory services and concurrency wireless networks best student paper consensus and leader election mobile agents computing in wireless and mobile networks modeling issues and adversity and self stabilizing and graph algorithms     *Nuclear Science Abstracts* ,1976-02     *Building Education and Research* Jay Yang,Weilen P. Chang,2005-08-17 Building Education and Research explores this new active area of research in a series of papers by internationally acclaimed experts presented at the CIB W89 International Conference on Building Education and Research held in July 1998 BEAR 98 in Brisbane Australia Sponsored in collaboratio jointly by the Queensland University of Technology the Conseil International du Batiment CIB and the Australian Institute of Building AIB the conference was organised around the theme Building Research and Education Beyond 2000 and looks at the factors that are changing the requirements of building education and research economic and technological concerns environmental concerns government policies Industries demands re evaluation of community expectations
