Introductory chapters provide overviews of terror medicine security and communications which are indispensable to successful preparedness while subsequent chapters concentrate on a particular field and how responders from that field communicate and interact with others during and after an event. Thus a chapter by a physician discusses not only the doctor's role but how that role is or should be coordinated with emergency medical technicians and police. Similarly chapters by law enforcement figures also review police responsibilities and interactions with nurses EMTs volunteers and other relevant responders. Developed from topics at recent Symposia on Terror Medicine and Security Local Planning also encompasses aspects of emergency and disaster medicine as well as techniques for diagnosis rescue coordination and security that are distinctive to a terrorist attack. Each chapter also includes a case study that demonstrates preparedness or lack thereof for a real or hypothetical event including lessons learned next steps and areas for improvement in this global era which increasingly calls for preparedness at a local level.
