Alzheimer's Disease - From Basic Research to Clinical Applications Hermann J. Gertz, Thomas Arendt, 2013-06-29

As human longevity continues to be extended so will the impact of age associated dementia on individual lives and society Alzheimer's disease as the most common cause of dementia in the elderly remains a sentinel problem and its underlying pathology is still poorly understood Available therapeutic strategies require considerable refinement and the development of new therapeutic strategies need input from basic research Thus continued efforts are necessary both to understand basic mechanisms of the condition and to achieve more powerful therapies This volume brings together the reports of basic scientists and clinical investigators The chapters provide a spectrum of information valuable for clinicians and scientists This issue bridges the gap between laboratory work in basic science and the development of urgently needed therapeutic strategies Areas presented are the molecular and cellular biology of the disease pathogenetic mechanisms and potential therapeutic targets genetics risk factors strategies of prevention and treatment as well as practical aspects of medical and social care for patients with Alzheimer's disease

MAO - The Mother of all Amine Oxidases John P.M. Finberg, Moussa B.H. Youdim, Peter Riederer, K.F. Tipton, 2013-12-01 Monoamine oxidase MAO is linked to psychiatric and neurological disorders because inhibitors of the enzyme are used clinically for treatment of affective disorders and Parkinson's disease One of the interesting new aspects of MAO is the occurrence in the human population of deletions of genes coding for one or the other enzyme subtype A or B This leads to the possibility of a genetic basis for psychiatric disorders based on MAO Subjects with deletions of type A or B and combined deletions have been described In the first group of 6 papers in this book the occurrence and characterization of these phenotypes as well as the structure of MAO genes is explored Advances in the biochemistry of MAO subtypes and their physiological function and localization in brain and periphery is included Other sections of the book deal with the neuroprotective action of MAO inhibitors and their pharmacology especially the pharmacology of new MAO B inhibitors
