Adventures In Transcendental Dialogues With Contemporary Thinkers:

Adventures in Transcendental Materialism Adrian Johnston, 2014-03-17 Critically engaging with thinkers including Slavoj Žižek, Alain Badiou, Catherine Malabou, Jean-Claude Milner, Martin Hagglund, William Connolly, and Jane Bennett, Johnston formulates a materialist and naturalist account of subjectivity that does full justice to human beings as irreducible to natural matter alone.

Neuroscience and Critique Jan De Vos, Ed Pluth, 2015-11-19 Recent years have seen a rapid growth in neuroscientific research and an expansion beyond basic research to incorporate elements of the arts, humanities, and social sciences. It has been suggested that the neurosciences will bring about major transformations in the understanding of ourselves, our culture, and our society. In academia, one finds debates within psychology, philosophy, and literature about the implications of developments within the neurosciences and the emerging fields of educational neuroscience, neuroeconomics, and neuroaesthetics, also bear witness to a neurological turn which is currently taking place. *Neuroscience and Critique* is a ground-breaking edited collection which reflects on the impact of neuroscience in contemporary social science and the humanities. It is the first book to consider possibilities for a critique of the theories, practices, and implications of contemporary neuroscience. Chapter 7 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-NonCommercial-NoDerivatives 3.0 license.

The Routledge Handbook of Psychoanalysis in the Social Sciences and Humanities Anthony Elliott, Jeffrey Prager, 2016-04-14 The *Routledge Handbook of Psychoanalysis in the Social Sciences and Humanities* provides a comprehensive critical overview of the historical, theoretical, and applied forms of psychoanalytical criticism. This path-breaking Handbook offers students new ways of understanding the powers and limits of psychoanalysis and of the social, cultural, and political possibilities of psychoanalytic critique. The book offers students and professionals clear and concise chapters on the development of psychoanalysis, introducing key theories that have influenced debates over the psyche, desire, and emotion in the social sciences and humanities. There are substantive chapters on classical Freudian theory, Kleinian and Bionian theory, object relations, psychoanalysis, Lacanian and post-Lacanian approaches, feminist psychoanalysis, as well as postmodern trends in psychoanalysis. There is a strong emphasis on interdisciplinary approaches to psychoanalytic critique, with contributions drawing from developments in sociology, politics, history, cultural studies, women's studies, and architecture.

Czesław Miłosz's Faith in the Flesh Stanley Bill, 2021 A study of the writings of Polish laureate Czesław Miłosz that focuses on the poet's attempts to recover perspectives on transcendence and religious belief in a secular age through creative engagement with sensual or material experience.

Onto-Cartography Levi R. Bryant, 2014-03-17 Defends and transforms naturalism and materialism to show how culture itself is formed by nature. Bryant endorses a pan-ecological theory of being, arguing that societies are ecosystems that can only be understood by considering nonhuman material agencies such as rivers and mountain ranges alongside signifying agencies such as discourses, narratives, and ideologies.

Derrida and the Legacy of

Psychoanalysis Paul Earlie,2021 Situating Derrida's engagement with Freud vis vis key contemporaries such as L vi Strauss and Foucault this title uses close analysis of a range of primary texts to show how Derrida reshaped Freud's insights in the very different intellectual context of post war France

Infinite Greed Adrian Johnston,2024-05-14 Selfishness is essential to capitalism or so both advocates and opponents claim In Infinite Greed Adrian Johnston argues that this consensus is mistaken Through a novel synthesis of Marxism and psychoanalysis he reveals how the relentless pursuit of profits is not fundamentally animated by human acquisitiveness Instead capitalism's strange infinite greed demands that individuals sacrifice their pleasures their well being and even themselves to serve inhuman capital Johnston traces the mechanisms that compel capitalist subjects to obey the cold imperative to accumulate in perpetuity and without limits and also without regard for the consequences for everyone and everything else Facing crises such as spiraling wealth inequality and the profit driven prospect of a looming ecological apocalypse the rational self interest of the majority would seem to dictate putting a stop to capitalist accumulation By bringing together the Marxian critique of political economy with psychoanalytic metapsychology Johnston shows why and how capitalism rather than being responsive to people's rationally selfish interests disregards and overrides them instead Unlike previous syntheses of Marxism and psychoanalysis Infinite Greed pairs Freudian and Lacanian concepts with the economic heart of Marx's historical materialism In so doing Johnston brings to light the complex intertwining of political and libidinal economies keeping us invested and complicit in perpetuating capitalism and its ills

Schelling, Hegel, and the Philosophy of Nature Benjamin Berger,2023-11-30 This book develops an original interpretation of the relationship between F W J Schelling and G W F Hegel It argues that the difference between these philosophers should be understood in light of their shared commitment to the philosophy of nature and the idea that spirit or humanity emerges from the natural world The author makes a case for the contemporary relevance of German idealist philosophy of nature by walking the reader through its major themes motivations and arguments Along the way Schelling and Hegel are shown to develop key insights about the structure of reality and the dependence of living things and human beings upon inorganic natural processes In elucidating the details of Schelling's and Hegel's respective philosophies of nature the book challenges some of our most basic assumptions about the scope of philosophical inquiry and the relationship between matter life and human existence Schelling Hegel and the Philosophy of Nature will appeal to scholars and advanced students working on German idealism as well as those interested in contemporary philosophies of nature and the topic of emergence

Inheritance in Psychoanalysis Joel Goldbach,James A. Godley,2018-02-15 In contrast to the way inheritance is understood in scientific discourse and culture more broadly inheritance in psychoanalysis is a paradox Although it's impossible strictly speaking for the unconscious to be inherited this volume demonstrates how the concept of inheritance can occasion a rich reassessment and reinvention of psychoanalytic theory and practice The collection enacts a critical traversal of inheritance for psychoanalysis from the most basic assumptions of natural or biological inheritance such as innateness heredity evolution

and ontogenesis to analysis of the ways cultural traditions can be challenged and transformed and finally to the reinvention of psychoanalytic practice in which the ethics of inheritance is fully realized as the individual's responsibility to transform the social bond. Featuring strong interdisciplinary analysis rooted in both psychoanalysis and philosophy, this volume further engages science, politics, and cultural studies and addresses contemporary political challenges such as autism and transgenderism.

Zizek Now Jamil Khader, Molly Anne Rothenberg, 2013-05-03 Arguably the most prolific and most widely read philosopher of our time Slavoj Žižek has made indelible interventions into many disciplines of the so-called human sciences that have transformed the terms of discussion in these fields. Although his work has been the subject of many volumes of searching criticism and commentary, there is no assessment to date of the value of his work for the development of these disciplines. Žižek Now brings together distinguished critics to explore the utility and far-ranging implications of Žižek's thought and provide an evaluation of the difference his work makes or promises to make in their chosen fields. As such, the volume offers chapters on quantum physics and Žižek's transcendentalist materialist theory of the subject, Hegel's absolute materialist Christianity, postcolonial violence, eco-politics, ceremonial acts, and the postcolonial revolutionary subject. Contributors to the volume include Adrian Johnston, Ian Parker, Todd McGowan, Bruno Bosteels, Erik Vogt, Verena Conley, Joshua Ramey, Jamil Khader, and Žižek himself.

Baroque Naturalism in Benjamin and Deleuze Tim Flanagan, 2021-10-18

This book itself a study of two books on the Baroque, proposes a pair of related theses: one interprets the other argumentatively. The first, enveloped in the second, holds that the significance of allegory Gilles Deleuze recognized in Walter Benjamin's 1928 monograph on seventeenth-century drama is itself attested in key aspects of Kantian, Leibnizian, and Platonic philosophy to wit, in the respective forms by which thought is phrased, predicated, and proposed. The second, enveloping the first, is a literalist claim about predication itself, namely that the aesthetics of agitation and hallucination so emblematic of the Baroque sensibility, as attested in its emblem books, adduces an avowedly metaphysical naturalism in which thought is replete with predicates. Oriented by Barbara Cassin's development of the concerted sense in which homonyms are critically distinct from synonyms, the philosophical claim here is that the Baroque names the intervallic relation that thought establishes between things. On this account, any subject finds its unity in a concerted state of disquiet, a state *rempli* in which phenomenologically speaking, experience comprises as much seeing as reading, as St. Jerome encountering Origen's *Hexapla*.

End of Phenomenology Tom Sparrow, 2014-06-04 Shows how speculative realism is replacing phenomenology as the beacon of realism in contemporary Continental philosophy.

Reading Lacan's *Écrits*: From 'The Freudian Thing' to 'Remarks on Daniel Lagache' Derek Hook, Calum Neill, Stijn Vanheule, 2019-07-23 The critic was Jacques Lacan's single most important text, a landmark in psychoanalysis which epitomized his aim of returning to Freud via structural linguistics, philosophy, and literature. Reading Lacan's *critique* is the first extensive set of commentaries on the complete edition of Lacan's *critique* to be published in English. An invaluable document in the history of psychoanalysis and one of the most challenging

intellectual works of the 20th Century Lacan's critics still today begs the interpretative engagement of clinicians scholars philosophers and cultural theorists The three volumes of Reading Lacan's critics offer just this a series of systematic paragraph by paragraph commentaries by some of the world's most renowned Lacanian analysts and scholars on the complete edition of the critics inclusive of lesser known articles such as Kant with Sade The Youth of Gide Science and Truth Presentation on Transference and Beyond the Reality Principle The originality and importance of Lacan's critics to psychoanalysis and intellectual history is matched only by the text's notorious inaccessibility Reading Lacan's critics is an indispensable companion piece and reference text for clinicians and scholars exploring Lacan's magnum opus Not only does it contextualize explain and interrogate Lacan's arguments it provides multiple interpretative routes through this most labyrinthine of texts Reading Lacan's critics provides an incisive and accessible companion for psychoanalysts and psychoanalytic psychotherapists in training and in practice as well as philosophers cultural theorists and literary social science and humanities researchers who wish to draw upon Lacan's pivotal work

Umbr(a): The Object Tom Eyers, Graham Harman, Adrian Johnston, Guy Le Gaufey, Todd McGowan, Duane Rousselle, Jelica Šumič Riha, Rado Riha, 2014

Zizek and Law Laurent de Sutter, 2015-03-05

The very first book dedicated to Slavoj Žižek's theoretical treatment of law this book gathers widely recognized Žižek scholars as well as legal theorists to offer a sustained analysis of the place of law in Žižek's work Whether it is with reference to symbolic law psychoanalytical law religious law positive law human rights to Lacan's Hegel's or Kant's philosophies of law or even to Jewish or Buddhist law Žižek returns again and again to law And what his work offers this volume demonstrates is a radically new approach to law and a rethinking of its role within the framework of radical politics With the help of Žižek himself who here and for the first time directly engages with the topic of law this collection provides an authoritative account of Žižek and law It will be an invaluable resource for researchers and students in the fields of law legal theory legal philosophy political theory psychoanalysis theology and cultural studies

The New Politics of Materialism Sarah Ellen Zweig, John Zammito, 2017-07-14 This collection which includes an international roster of contributors from philosophy history literature and science is the first to ask what is new about the new materialism and place it in interdisciplinary perspective

Dilemmas of Truth in Alain Badiou's Philosophy Giosuè Ghisalberti, 2023-01-25 This book on Alain Badiou's philosophy begins with a central theme the attempt to trace how Badiou has replaced the tradition of critical theory and negation with an affirmative support of his four generic procedures art science love and art as inseparable from his revitalization of both the subject and the concept of truth By defining four procedures as conditions of philosophy Badiou makes the attempt to establish each as inter related and systematically necessary to make a new proposal for thought The fidelity to Badiou's project for the 21st century however requires a fundamental examination are his four truths complicated by an inescapable dilemma And if so can the four truths be retained as a whole or does the individual reader have to make a decision that will alter Badiou's project and conclusions By presenting the dilemmas of his thought the scholarly reader will be in a position to

then pursue the necessary study to come to their own conclusions and by doing so become sufficiently free to resist the many coercions of social and political life in liberal democracies today

The Metamorphoses of the Brain - Neurologisation and its Discontents Jan De Vos, 2016-05-04 What are we exactly when we are said to be our brain This question leads Jan De Vos to examine the different metamorphoses of the brain the educated brain the material brain the iconographic brain the sexual brain the celebrated brain and finally the political brain This first protracted and sustained argument on neurologisation which lays bare its lineage with psychologisation should be taken seriously by psychologists educationalists sociologists students of cultural studies policy makers and above all neuroscientists themselves *Being Possible* Stephen Dozeman, 2020-12-16 In April 2019 Canadian psychologist Jordan B Peterson sat down with Slovenian philosopher and psychoanalyst Slavoj Žižek for a debate that would collect higher ticket prices than the local Toronto Maple Leafs game The debate was considered by many to be something of a dud with both figures largely appearing to talk past each other but to ignore it would be a mistake Instead the fact that a major public event put the Communist vs Capitalist question back into play speaks to larger cultural trends that are occurring an old consensus seems to be bursting at the seams and it's unclear if the center will hold or be moved Taking on the existentialism of Martin Heidegger as their starting point Stephen Dozeman argues that understanding this debate means starting with the individual subject and understanding its increasingly confused and precarious place in a disenchanted world Wandering in between philosophical theory history popular culture and back to philosophy again this book tries to explore why so many feel compelled to call ancient wisdom into question and what it might mean to take responsibility for our lives

The Philosophical Foundations of Ecological Civilization Arran Gare, 2016-08-05 The global ecological crisis is the greatest challenge humanity has ever had to confront and humanity is failing The triumph of the neo liberal agenda together with a debauched scientism has reduced nature and people to nothing but raw materials instruments and consumers to be efficiently managed in a global market dominated by corporate managers media moguls and technocrats The arts and the humanities have been devalued genuine science has been crippled and the quest for autonomy and democracy undermined The resultant trajectory towards global ecological destruction appears inexorable and neither governments nor environmental movements have significantly altered this or indeed seem able to The Philosophical Foundations of Ecological Civilization is a wide ranging and scholarly analysis of this failure This book reframes the dynamics of the debate beyond the discourses of economics politics and techno science Reviving natural philosophy to align science with the humanities it offers the categories required to reform our modes of existence and our institutions so that we augment rather than undermine the life of the ecosystems of which we are part From this philosophical foundation the author puts forth a manifesto for transforming our culture into one which could provide an effective global environmental movement and provide the foundations for a global ecological civilization
