Surfactants and Cosolvents for NAPL Remediation A Technology Practices Manual Donald F. Lowe, Carroll L. Oubre, C. H. Ward, 1999-03-26 A 19.3 million Department of Defense grant to Rice University funds the Advanced Applied Technology Demonstration Facility AATDF. One of the project goals is the development of reduction strategies for nonaqueous phase liquids (NAPLs) in the subsurface. Surfactants and Cosolvents for NAPL Remediation records the results of AATDF research. The manual is a guide to the practical application of surfactants and cosolvent for in situ remediation. It is targeted to decision makers and anyone concerned with the design or implementation of these technologies. The book discusses the situational viability of surfactants and cosolvents, the possible results, design and operation. It includes case studies, step by step guidance, and project cost work sheets. The successful results of the AATDF research as documented in Surfactants and Cosolvents for NAPL Remediation are an invaluable contribution to the future of subsurface remediation. Without source NAPL reduction, the alternative is decades of plume management through pump and treat. **Handbook of Aerosol Technology** Paul Amsdon Sanders, 1979 OSHA Technical Manual United States.
