Advancing Collaboration Theory John C. Morris, Katrina Miller-Stevens, 2015-09-07 The term collaboration is widely used but not clearly understood or operationalized However collaboration is playing an increasingly important role between and across public nonprofit and for profit sectors Collaboration has become a hallmark in both intragovernmental and intergovernmental relationships As collaboration scholarship rapidly emerges it diverges into several directions resulting in confusion about what collaboration is and what it can be used to accomplish This book provides much needed insight into existing ideas and theories of collaboration advancing a revised theoretical model and accompanying typologies that further our understanding of collaborative processes within the public sector Organized into three parts each chapter presents a different theoretical approach to public problems valuing the collective insights that result from honoring many individual perspectives Case studies in collaboration split across three levels of government offer additional perspectives on unanswered questions in the literature Contributions are made by authors from a variety of backgrounds including an attorney a career educator a federal executive a human resource administrator a police officer a self employed entrepreneur as well as scholars of public administration and public policy Drawing upon the individual experiences offered by these perspectives the book emphasizes the commonalities of collaboration It is from this common ground the shared experiences forged among seemingly disparate interactions that advances in collaboration theory arise **Advancing Collaboration Theory** offers a unique compilation of collaborative models and typologies that enhance the existing understanding of public sector collaboration

The Politics of Foster Care Administration in the United States Rebecca H. Padot, 2014-10-10 Government by proxy and intergovernmental relations profoundly affect the public administration of foster care Using examples from foster care systems in the states of Delaware Michigan New York and Rhode Island Rebecca Padot eloquently combines a rigorous methodology and theory work to expose the conditions under which foster care outcomes can be improved The cases selected suggest that the federal government has increased its focus on measuring the performance of state programs while simultaneously decreasing its funding of state foster care programs and offering the states very little management or mentorship Padot turns the page and recommends administrators place a greater priority on building community partners integrating the advice of mentors providing leadership from public managers and cultivating relationships with the federal government An original and timely resource for scholars and practitioners this book represents a significant contribution to our understanding of how leadership and management variables may be associated with more positive foster care practices and performance in the United States

Anticipatory Policymaking Rob A.

DeLeo,2015-09-16 Public policy analysts and political pundits alike tend to describe the policymaking process as a reactive sequence in which government develops solutions for clearly evident and identifiable problems While this depiction holds true in many cases it fails to account for instances in which public policy is enacted in anticipation of a potential future problem Whereas traditional policy concerns manifest themselves through ongoing harms anticipatory problems are projected to occur sometime in the future and it is the prospect of their potentially catastrophic impact that generates intense speculation and concern in the present Anticipatory Policymaking When Government Acts to Prevent Problems and Why It Is So Difficult provides an in depth examination of the complex process through which United States government institutions anticipate emerging threats Using contemporary debates over the risks associated with nanotechnology pandemic influenza and global warming as case study material Rob A DeLeo highlights the distinctive features of proactive governance By challenging the pervasive assumption of reactive policymaking DeLeo provides a dynamic approach for conceptualizing the political dimensions of anticipatory policy change

Creating Human Value as Public Management Theory Joseph Drew,2025-04-16 Creating Human Value CHV is a powerful public management theory that places the person at the centre of all decision making It is founded on millennia old natural law philosophy updated to cope with contemporary problems At the heart of CHV is the ideal of human flourishing this is achieved through pursuing the common good via public policy in a way that respects human dignity To paraphrase Socrates it is about caring for the city rather than merely the city's possessions This book is the product of almost a decade of research and teaching of this compelling alternate public management theory to government decision makers in Australia and abroad In sum CHV is a much needed antidote to currently popular public management approaches that have unduly prioritized the common good over dignity with catastrophic consequences for the lives of many people This book will appeal to readers interested in public management public policy and government

Toward Resilient Communities Christopher L. Atkinson,2013-11-12 In June 2011 the city of Minot North Dakota sustained the greatest flood in its history Rather than buckling under the immense weight of the flood on a personal and community level government civic groups and citizens began to immediately assess and address the event's impacts Why did the disaster in Minot lead to government and community resilience whereas during Hurricane Katrina the non resilience of the government and community of New Orleans resulted in widespread devastation This book seeks to answer that question by examining how local government institutions affect pre and post disaster community and business resilience Utilizing both survey methods and interviews Atkinson analyzes the disasters that occurred in New Orleans Louisiana Palm Beach County Florida and Minot North Dakota He argues that institutional culture within local government impacts not only the immediate outcomes experienced during response but the long term prognosis of recovery for a community outside the walls of city hall Understanding tendencies within a community that lead to increased vulnerability of both individuals and businesses can lead to shifts in governmental community priorities and potentially to

improved resilience in the face of hazard events Relevant to scholars of public administration disaster researchers and government officials this book contributes to a growing literature on community and business resilience It explores not just the devastation of natural disasters but profiles governmental impacts that led to responsive and able processes in the face of disaster

Local Disaster Resilience Ashley D. Ross, 2013-11-12 Since 2000 the Gulf Coast states Texas Louisiana Mississippi Alabama and Florida have experienced a series of hurricanes multiple floods and severe storms and one oil spill These disasters have not only been numerous but also devastating Response to and recovery from these unprecedented disasters has been fraught with missteps in management In efforts to avoid similar failures in the future government agencies and policy practitioners have looked to recast emergency management and community resilience has emerged as a way for to better prevent manage and recover from these disasters How is disaster resilience perceived by local government officials and translated into their disaster response and recovery efforts Ashley D Ross systematically explores and measures disaster resilience across the Gulf Coast to gain a better understanding of how resilience in concept is translated into disaster management practices particularly on the local government level In doing so she presents disaster resilience theory to the Gulf Coast using existing data to create county level baseline indicators of Gulf Coast disaster resilience and an original survey of county emergency managers and elected municipal officials in 60 counties and 120 municipalities across the Gulf States The findings of the original survey measure the disaster resilience perceptions held by local government officials which are examined to identify commonalities and differences across the set of cases Additional analyses compare these perceptions to objective baseline indicators of disaster resilience to assess how perceptions align with resilience realities *Local Disaster Resilience* not only fills a critical gap in the literature by applying existing theories and models to a region that has experienced the worst disasters the United States has faced in the past decade but it can also be used as a tool to advance our knowledge of disasters in an interdisciplinary manner
