BLS for Healthcare Providers , 2006 **The Rise of the Robots** Martin Ford, 2015-09-03 Intelligent algorithms are already well on their way to making white collar jobs obsolete travel agents data analysts and paralegals are currently in the firing line In the near future doctors taxi drivers and ironically even computer programmers are poised to be replaced by robots Without a radical reassessment of our economic and political structures we risk the very implosion of the capitalist economy itself In *The Rise of the Robots* technology expert Martin Ford systematically outlines the achievements of artificial intelligence and uses a wealth of economic data to illustrate the terrifying societal implications From health and education to finance and technology his warning is stark all jobs that are on some level routine are likely to eventually be automated resulting in the death of traditional careers and a hollowed out middle class The robots are coming and we have to decide now whether the future will bring prosperity or catastrophe Megachange Darrell M. West, 2016-10-18 Big unexpected changes are here to stay Slow incremental change has become a relic of the past Today's shifts come fast and big what Darrell West calls megachanges in which dramatic disruptions in trends and policies occur on a regular basis Domestically we see megachange at work in the new attitudes and policies toward same sex marriage health care smoking and the widespread legalization of marijuana use Globally we have seen the extraordinary rise and then collapse of the Arab Spring the emergence of religious zealotry the growing influence of nonstate actors the spread of ISIS fomented terrorism the rise of new economic and political powers in Asia and the fracturing of once stable international alliances Long held assumptions have been shattered and the proliferation of unexpected events is confounding experts in the United States and around the globe Many of the social and political institutions that used to anchor domestic and international politics have grown weak or are in need of dramatic reform What to do West says that we should alter our expectations about the speed and magnitude of political and social change We also need to recognize that many of our current governing processes are geared to slow

deliberation and promote incremental change not large scale transformation With megachange becoming the new normal our domestic and global institutions must develop the ability to tackle the massive economic political and social shifts that we face
