Planting Design Patrick Mooney, 2019-10-30 Landscape designers have long understood the use of plants to provide

beauty aesthetic pleasure and visual stimulation while supporting a broad range of functional goals However the potential for plants in the landscape to elicit human involvement and provide mental stimulation and restoration is much less well understood This book meshes the art of planting design with an understanding of how humans respond to natural environments Beginning with an understanding of human needs preferences and responses to landscape the author interprets the ways in which an understanding of the human environment interaction can inform planting design Many of the principles and techniques that may be used in planting design are beautifully illustrated in full colour with examples by leading landscape architects and designers from the United Kingdom Europe North America and Asia including Andrea Cochran Andrea Cochran Landscape Architecture San Francisco CA Design Workshop Inc Richard Hartlage Land Morphology Seattle WA Shunmyo Masuno Japan Landscape Consultants Ltd Yokohama Piet Oudolf Hummelo The Netherlands Melody Redekop Vancouver Christine Ten Eyck Ten Eyck Landscape Architects Inc Austin TX Kongjian Yu Turenscape Ltd Beijing The book stimulates thought provides new direction and assists the reader to find their own unique design voice Because there are many valid processes and intentions for landscape design the book is not intended to be overly prescriptive Rather than presenting a strict design method and accompanying set of rules Planting Design provides information insight and inspiration as a basis for developing the individual designer s own expression in this most challenging of art forms

Taylor's Guide to Ground Covers David Michener,Nan Sinton,2001 No category of plants works harder than ground covers to help a gardener create a beautiful yet low maintenance landscape In this book readers will discover the best plants to stabilize banks and control erosion to substitute for turf where grass won t grow or is hard to mow to line curbs and driveways where salt will damage ordinary plants to enhance a landscape with broad dramatic sweeps

The Ann Lovejoy Handbook of Northwest Gardening Ann Lovejoy,2012-10-30 The organic gardening movement has been long established among vegetable growers With the mainstreaming of ideas about environmental and ecological preservation the organic movement has come to ornamental gardening And one of the primary spokespeople for that movement is Sasquatch s longtime author Ann Lovejoy This new book is a complete handbook for ornamental gardening follows the principles and techniques of organic and sustainable gardening Gardening naturally does mean going without products like Roundup Weed and Feed and chemical fertilizers It also means that gardeners may opt for a selection of native plants that are compatible with local climate and soils Some of the paradigm shift has to do with getting over the notion that one s garden needs to be as spotless and tidy as something on a magazine cover Gardening is all about process and the methods that Ann Lovejoy explains in this book emphasize good soil preparation composting drainage mulching and right plant selection This comprehensive book

covers the steps from landscaping and designs to soil preparation to planting beds She covers all of the elements of the garden ground covers lawns shrubs bulbs trees all with an eye to building a sustainable garden that grows without chemical fertilizers and pest control You can try to make an Arizona backyard look like a Connecticut estate but it s going to take a lot of work constant maintenance more water than all the other gardens on your block and a fat checkbook There s a simpler more gratifying way to garden that is also good for people pets and wildlife This practical book tells gardeners how to achieve that
