Blood And Water The Indus River Basin In Modern History:

Blood and Water David Gilmartin, 2015-06-05 The Indus basin was once an arid pastoral watershed but by the second half of the twentieth century it had become one of the world's most heavily irrigated and populated river basins. Launched under British colonial rule in the nineteenth century, this irrigation project spurred political, social, and environmental transformations that continued after the 1947 creation of the new states of India and Pakistan. In this first large-scale environmental history of the region, David Gilmartin focuses on the changes that occurred in the basin as a result of the implementation of the world's largest modern integrated irrigation system. This masterful work of scholarship explores how environmental transformation is tied to the creation of communities and nations, focusing on the intersection of politics, statecraft, and the environment.

Blood and Water David Gilmartin, 2020-04-14 The book is a history of the political and environmental transformation of the Indus basin as a result of the modern construction of the world's largest integrated irrigation system. Begun under British colonial rule in the 19th century, this transformation continued after the region was divided between two new states, India and Pakistan, in 1947. Massive irrigation works have turned an arid region into one of dense agricultural population, but its political legacies continue to shape the politics and statecraft of the region. Nature in the Middle Ages and the Early Modern Times Albrecht Classen, 2024-07-01 The study of pre-modern anthropology requires the close examination of the relationship between nature and human society, which has been both precarious and threatening as well as productive, soothing, inviting, and pleasurable. Much depends on the specific circumstances, as the works by philosophers, theologians, poets, artists, and medical practitioners have regularly demonstrated. It would not be good enough, as previous scholarship has commonly done, to examine simply what the various writers or artists had to say about nature. While modern scientists consider just the hard-core data of the objective world, cultural historians and literary scholars endeavor to comprehend the deeper meaning of the concept of nature presented by countless writers and artists. Only when we have a good grasp of the interactions between people and their natural environment are we in a position to identify and interpret mental structures, social and economic relationships, medical and scientific concepts of human health, and the messages about all existence as depicted in major art works. In light of the current conditions,

threatening to bring upon us a global crisis, it matters centrally to take into consideration pre-modern discourses on nature and its enormous powers to understand the topoi and tropes determining the concepts through which we perceive nature. Nature thus proves to be a force far beyond all human comprehensibility, being both material and spiritual, depending on our critical approaches.

Water Resources of Pakistan Muhammad Arif Watto, Michael Mitchell, Safdar Bashir, 2021-03-25 This book presents the first comprehensive assessment of water resources in Pakistan, including surface water resources and groundwater resources. Turbulent Streams Roderick I. Wilson, 2021-05-31 In *Turbulent Streams: An Environmental History of Japan's Rivers 1600-1930* Roderick I. Wilson describes how the rivers of Japan are both hydrologically and historically dynamic Today these waterways are slowed, channeled, diverted, and dammed by a myriad of levees, multi-ton concrete tetrapods, and massive multipurpose dams In part this intensive engineering arises from the waterways falling great elevations over short distances, flowing over unstable rock and soil, and receiving large quantities of precipitation during monsoons and typhoons But this modern river regime is also the product of a history that narrowed both these waterways and people's diverse interactions with them in the name of flood control Neither a story of technological progress nor environmental decline, this history introduces the concept of environmental relations as a category of historical analysis both to explore these fluvial interactions and reveal underappreciated dimensions of Japanese history

Animal Labor and Colonial Warfare James L. Hevia, 2018-08-23 Until well into the twentieth century pack animals were the primary mode of transport for supplying armies in the field The British Indian Army was no exception In the late nineteenth century, for example, it forcibly pressed into service thousands of camels of the Indus River basin to move supplies into and out of contested areas, a system that wreaked havoc on the delicately balanced multispecies environment of humans, animals, plants, and microbes living in this region of Northwest India In *Animal Labor and Colonial Warfare* James Hevia examines the use of camels, mules, and donkeys in colonial campaigns of conquest and pacification, starting with the Second Afghan War during which an astonishing 50,000 to 60,000 camels perished and ending in the early twentieth century Hevia explains how during the nineteenth and twentieth centuries a new set of human-animal relations were created as European powers and the United States expanded their colonial possessions and attempted to put both local economies and ecologies in the service of resource extraction The results were devastating to animals and human communities alike, disrupting centuries-old ecological and economic relationships And those effects were lasting Hevia shows how a number of the key issues faced by the postcolonial nation-state of Pakistan, such as shortages of clean water for agriculture, humans, and animals, and limited resources for dealing with infectious diseases, can be directly traced to decisions made in the colonial past An innovative study of an underexplored historical moment, *Animal Labor and Colonial Warfare* opens up the animal studies to non-Western contexts and provides an empirically rich contribution to the emerging field of multispecies historical ecology

Labors of Division Navyug Gill, 2024-01-16 One of the most durable figures in modern history, the peasant has long been a site of intense intellectual and political debate Yet underlying much of this literature is the assumption that

peasants simply existed everywhere a general if not generic group traced backward from modernity to antiquity Focused on the transformation of Panjab during the nineteenth and early twentieth centuries this book accounts for the colonial origins of global capitalism through a radical history of the concept of the peasant demonstrating how seemingly fixed hierarchies were in fact produced legitimized and challenged within the preeminent agricultural region of South Asia Navyug Gill uncovers how and why British officials and ascendant Panjabis disrupted existing forms of identity and occupation to generate a new agrarian order in the countryside The notion of the hereditary caste peasant engaged in timeless cultivation thus emerged paradoxically as a result of a dramatic series of conceptual juridical and monetary divisions Far from archaic relics this book ultimately reveals both the landowning peasant and landless laborer to be novel political subjects forged through the encounter between colonialism and struggles over culture and capital within Panjabi society Questions of progress exploitation and knowledge come to animate the vernacular operations of power With this history Gill brings difference and contingency to understandings of the global past in order to re think the itinerary of comparative political economy as well as alternative possibilities for emancipatory futures

Women and the Sikh Diaspora in California Nicole Ranganath, 2024-05-31 This book charts the transoceanic history of South Asian women in California through their speech and songs across the twentieth century Nicole Ranganath reimagines the history of the South Asian diaspora through an examination of gender and the dynamic interplay of water and land in the cultural history of Sikhs a faith and cultural community that emerged in the Punjab region of north South Asia over 550 years ago It shows how the

history and music of transoceanic communities in this case Sikhs spilled beyond the boundaries of regions empires and nation states It emphasizes the heterogeneity of the South Asia diaspora by uncovering the distinct history of women s migration experiences as well as an alternative oceanic imaginary among Sikhs that envisions unity in the cosmos It foregrounds the pivotal role that women played in transforming Sikh communities in California through songs and female affinities Based on six years of fieldwork in rural northern California it explores song as a window into the interior lives of Sikh women through their performance of diverse genres gadar anti colonial songs folk music hymns and autobiographical songs This sonic history of South Asian women in the diaspora dislodges dominant paradigms in diaspora studies and oceanic humanities that depict men as mobile and women as stationary Women and the Sikh Diaspora in California will interest scholars of migration South Asia and South Asian American studies oceanic humanities Sikh studies music and women s studies It is also essential reading for anyone who is curious about global music and migration as well as Sikh history *The Geopolitics of Melting Mountains* Alexander E. Davis, 2023-05-12 The book addresses the urgent need for rethinking the geopolitics and ecology in the Himalaya by emphasising the entanglements between these two factors Most international relations analyses of the Himalaya emphasize the central role of the region s states and their great power struggles By reducing the region to its state actors however we miss the intense more than human diversity of the region and the crucial role that the mountains play in the global environment In doing so the book makes a major contribution to international relations theory by drawing on insights from international political ecology It first theorises international political ecology and examines the Himalaya as a global region before moving looking at the international aspects of political ecology in the Himalaya through key areas of the mountains where international politics and ecology are deeply inextricably linked It presents three detailed case studies of different environmental and political issues in the Himalaya icecaps the India China Pakistan boundary dispute in the western Himalaya foothills and forests the Nepal Bhutan Sikkim borderlands and rivers the India China Bangladesh dispute over the Brahmaputra River basin Each case study draws on a mix of source materials including fieldwork government sources foreign policy discourse Himalayan ethnographies and environmental and ecological sciences scholarship **'Performing' Nature** Priyanka Basu, Radha Kapuria, 2025-02-18 This book is the first to explore the interconnections between ecology and performance in South Asia Aiming to green studies of music and performance this book explores intersections between ethnography history eco and ethnomusicology and film and performance studies by paying particular attention to the ecological turn more broadly visible in South Asian studies The essays in the volume take inspiration from these different methodological strains in recent scholarship connecting the environment with South Asian music and performance traditions The contributors address varied ecological settings of South Asian music and performance from riverscapes to coastal communities and from the locations of instrument makers to negotiations of the climate crisis and the COVID 19 pandemic The book also covers the vast geographical sweep of South Asia from Pakistan in the northwest to

Sri Lanka in the south and from Bangladesh in the east to the Malabar coast of southwest India The novelty of the volume lies not just in mapping the dialogism between ecology and music through reflections on liminality gender resistance and identity but also in bringing forth new archival strategies digitisation and digital cultures in conversation with ethnographic findings This book will be of value to students and scholars of arts and environmental studies particularly those interested in the relationship between art culture and environment within the realm of South Asian music and performance traditions The chapters in this book were originally published as a special issue of South Asia Journal of South Asian Studies and are accompanied by a new Foreword by Jim Sykes and an Afterword by Sugata Ray **Imagining Industan** Zafar Adeel, Robert G. Wirsing, 2016-10-20 This volume calls upon over a dozen Indus observers to imagine a scenario for the Indus basin in which transboundary cooperation over water resources overcomes the insecurity arising from water dependence and scarcity From diverse perspectives its essays examine the potential benefits to be gained from revisiting the 1960 Indus Waters Treaty as well as from mounting joint efforts to increase water supply to combat climate change to develop hydroelectric power and to improve water management The Indus basin is shared by four countries Afghanistan China India and Pakistan The basin's significance stems in part simply from the importance of these countries three of them among the planet's most populous states one of them boasting the world's second largest economy and three of them members of the exclusive nuclear weapons club However the basin's significance stems also from the great importance of the Indus waters themselves due especially to the region's massive dependence on irrigated agriculture as well as to the menace of climate change and advancing water scarcity The Industan this volume imagines is a definite departure from business as usual responses to the Indus basin's emerging fresh water crisis The objective is to kindle serious discussion of the cooperation needed to confront what many water experts believe is developing into one of the planet's most gravely threatened river basins It is thus both assessment of the current state of play in regard to water security in the Indus basin and recommendation about where to go from here *The Frontier in British India* Thomas Simpson, 2021-01-07 An innovative account of how distinctive forms of colonial power and knowledge developed at the territorial fringes of British India Thomas Simpson considers the role of frontier officials as surveyors cartographers and ethnographers military violence in frontier regions and the impact of the frontier experience on colonial administration **Climate Change and Water-Related Challenges in Pakistan** Zulfiqar A. Bhutta, Jai K. Das, 2025-03-27 This collection is a compilation of invited articles emanating from a series of conferences related to climate change water and food security in Pakistan one of the most affected countries by climate change and its consequences The subtheme of water is also apt as Pakistan not only faces the crisis of water insecurity in many parts of the country but also has faced floods of biblical proportions over that last two decades This book considers a range of topics related to water security safety the relationship to agriculture and human nutrition as well as gender dimensions of climate change in these contexts The national and international mix of authors presents some of the leading academics engaged in

the subject area in Pakistan and globally and covers not only the burden and epidemiology of the problem but also feasible and affordable solutions in the medium to long term We hope that the scholarship will serve as the basis for continued discourse and importantly accelerated action

Critical Approaches to Science and Religion Myrna Perez

Sheldon,Ahmed Ragab,Terence Keel,2023-03-21 Critical Approaches to Science and Religion offers a new direction for scholarship on science and religion that examines social political and ecological concerns long part of the field but never properly centered The works that make up this volume are not preoccupied with traditional philosophical or theological issues Instead the book draws on three vital schools of thought critical race theory feminist and queer theory and postcolonial theory Featuring a diverse array of contributors it develops critical perspectives by examining how histories of empire slavery colonialism and patriarchy have shaped the many relationships between science and religion in the modern era In so doing this book lays the groundwork for scholars interested in speaking directly to matters such as climate change structural racism immigration health care reproductive justice and sexual identity

Water Policy in Pakistan Mahmood

Ahmad,2023-09-26 The water policy issues are well documented in a large set of reports and studies completed over time showing that the policy prescription and its implementation has been weak in the past as this book reveals The key reforms initiated were lost due to a lack of government s will and commitment and more so by pervasive political economy of water Given this background each chapter in the book follows a balanced approach in seeking and evaluating alternate solutions to water management issues especially improvements in water governance and tackling new challenges emerging from the climate change in the short and long term This approach underpins the importance of moving from the culture of piloting projects to actual implementation on an impact oriented scale The book would also highlight that most of the water solutions lie outside the water sector such as agriculture population economy etc Post COVID 19 policies are exploring new food health nexus that calls for nature based solutions for our future agriculture growth The book would show case pioneer work underway in Pakistan on how new policy discourse can reduce water use in agriculture without investing in expensive water technology and infrastructure thus saving enough water for other competing purposes
