*Breaking the Aging Code* Vincent C. Giampapa,Miryan Ehrlich Williamson,2003-11 In this groundbreaking book a visionary plastic surgeon and anti aging pioneer presents a radical new theory on how people age suggesting that the body is not irreversibly programmed by a finite number of cell divisions to age and die but rather is built for longevity and self repair

*A Stroke Was My Teacher* James Crawford,2011-07-22 The book begins by revealing new ideas about how and why embolic stroke and heart attacks share a common history involving clot formation The only distinction between the two diseases is where the clot finally stops If in the brain it results in a stroke if in the heart muscle a heart attack Thus the first portion of the book Chapters 1 4 documents how the mechanism of clot formation was studied through the eyes of a lifelong research scientist who was not a stroke expert but a stroke survivor Described in those chapters are entirely new ideas about how and why clots form and how to prevent them While my four years of stroke investigation so far was unfolding I simultaneously carefully recorded my daily observations as I experienced an embolic shower type of stroke My goal was to assemble a guide for all stroke victims alerting them what to expect and also my evaluation of a number of treatment modalities nutrients supplements etc designed to save money and frustration to newcomers to the stroke world as well as the initiated The big difference between this and other accounts of embolic stroke is that in this case it is framed in the context of an aging body If you do not already know this distinction is important since there is a fine line between the effects of aging and the effects of stroke The upshot of this book is to offer my evidence to the reader that stroke and heart attack are largely avoidable diseases My thought is if the reader thinks what I say makes sense they can take the recommended action starting today to minimize their risk And it is so incredibly simple and virtually cost free
