Spurgeon, 2005 The frontier and Western expansionism are so quintessentially a part of American history that the literature of the West and Southwest is in some senses the least regional and the most national literature of all The frontier the place where cultures meet and rewrite themselves upon each other's texts continues to energize writers whose fiction evokes destroys and rebuilds the myth in ways that attract popular audiences and critics alike Sara L. Spurgeon focuses on three writers whose works not only exemplify the kind of engagement with the theme of the frontier that modern authors make but also show the range of cultural voices that are present in Southwestern literature Cormac McCarthy Leslie Marmon Silko and Ana Castillo Her central purposes are to consider how the differing versions of the Western mythic tales are being recast in a globalized world and to examine the ways in which they challenge and accommodate increasingly fluid and even dangerous racial cultural and international borders In Spurgeon's analysis the spaces in which the works of these three writers collide offer some sharply differentiated visions but also create new and unsuspected forms providing the most startling insights Sometimes beautiful sometimes tragic the new myths are the expressions of the larger culture from which they spring both a projection onto a troubled and troubling past and an insistent prophetic vision of a shared future [A Research Guide to Gothic Literature in English](#) Sherri L. **Degradation, Dehumanization** Paulus Kaufmann, Hannes Kuch, Christian Neuhaeuser, Elaine Webster, 2010-10-07

Degradation dehumanization instrumentalization humiliation and nonrecognition these concepts point to ways in which we understand human beings to be violated in their dignity Violations of human dignity are brought about by concrete practices and conditions some commonly acknowledged such as torture and rape and others more contested such as poverty and exclusion This volume collates reflections on such concepts and a range of practices deepening our understanding of human dignity and its violation bringing to the surface interrelationships and commonalities and pointing to the values that are thereby shown to be in danger In presenting a streamlined discussion from a negative perspective complemented by conclusions for a positive account of human dignity the book is at once a contribution to the body of literature on what dignity is and how it should be protected as well as constituting an alternative fresh and focused perspective relevant to this significant recurring debate As the concept of human dignity itself crosses disciplinary boundaries this is mirrored in the unique range of perspectives brought by the book's European and American contributors in philosophy and ethics law human rights literature cultural studies and interdisciplinary research This volume will be of interest to social and moral philosophers legal and human rights theorists practitioners and students
