Mastroianni, Jeffrey P. Kahn, Nancy E. Kass, 2019 Public health raises critical ethics issues and concerns making public health ethics an essential topic for students and public health professionals The 73 chapters in this volume examine public health ethics across a broad range of public health topics both in the U S and globally It is the first ever comprehensive collection devoted to public health ethics *Shadows of Tyranny* Ken McGoogan, 2024-08-24 Bestselling historian and author Ken McGoogan delves into dictatorships of the twentieth century to sound this crucial alarm about the possibility of democratic collapse in the United States and its implications for Canada Twentieth century novels such as George Orwell s 1984 and Margaret Atwood s *The Handmaid s Tale* produced visions of future dystopia that rang with echoes of past tyrannies Always implied was a warning that history s worst chapters are never truly closed and that we must not fail as many of our forebears did to recognize that the threat of totalitarianism cannot simply be wished away *Awakening to Invasion* an alarming and engrossing work of non

fiction from acclaimed Canadian author Ken McGoogan draws on this sense of looping history to show how figures like Donald Trump replay many aspects of the authoritarianism that spread in the middle of the last century. Calling not only on Orwell and Atwood but also on H G Wells, Yevgeny Zamyatin, Jack London and Hannah Arendt, McGoogan traces the ways democracy succumbed to paranoia, polarization, scapegoating and demagoguery less than a hundred years ago. These same forces he argues are now driving a far right movement in the United States that seems devoted to using Trump's warped charisma as a wrecking ball to clear the way for autocracy that closely resembles the dictatorships that stoked the Second World War. With this prospect, McGoogan's central questions become all the more pressing: How should Canadians respond officially and individually to the possibility of democratic collapse in our powerful neighbour to the south? Is talk of manifest destiny from right wing American firebrands like Tucker Carlson just chatter for the sake of notoriety? Or is it a hint of the expansionist urges that always lie at the heart of authoritarianism and that may one day point the American military machine in our direction on the pretext of liberating us? In the cautionary spirit of earlier visionary works, *Awakening to Invasion* offers a galvanizing image of a dark possible future as well as an urgent call to act in the belief that we still have the time and ability to ward it off.

Trade in Water Under International Law Fitzgerald Temmerman, 2017-07-28 It is clear that more sustainable and efficient use of fresh water resources will become crucial in future global water management to avoid major threats to biological life. *Trade in Water Under International Law* offers a careful and well reasoned introduction and analysis of this emerging and largely uncharted subject of international trade law which has hitherto been of key importance in domestic law and policy, exploring the potential and limits of addressing the use of water resources in the context of World Trade Organization law.

Whose Water Is It, Anyway? Maude Barlow, 2019-09-03 Maude Barlow is one of our planet's greatest water defenders. Naomi Klein, bestselling author of *This Changes Everything* and *The Shock Doctrine*. The Blue Communities Project is dedicated to three primary things: that access to clean drinkable water is a basic human right; that municipal and community water will be held in public hands; and that single use plastic water bottles will not be available in public spaces. With its simple straightforward approach, the movement has been growing around the world for a decade. Today Paris, Berlin, Bern and Montreal are just a few of the cities that have made themselves Blue Communities. In *Whose Water Is It Anyway?*, renowned water justice activist Maude Barlow recounts her own education in water issues as she and her fellow grassroots water warriors woke up to the immense pressures facing water in a warming world. Concluding with a step by step guide to making your own community blue, Maude Barlow's latest book is a heartening example of how ordinary people can effect enormous change.

Stemming the Tide Madeline Baer, 2017 When privatization of public services swept the developing world in the 1990s it was part of a seemingly unstoppable tide of neoliberal reforms aimed at reducing the role of the state and reorienting economies toward market led policymaking Consequently water privatization sparked a fierce debate over whether public services should be owned and managed by private corporations and gave rise to a water justice movement that redefined water services as basic human rights *Stemming the Tide* explores how the human right to water and sanitation is fulfilled in different contexts whether neoliberal policies like privatization pose a threat to the right to water and whether rights fulfillment leads to meaningful social change
