This ring tester is an inexpensive and effective way to test any high Q inductive component. It is especially useful for doing a quick check on flyback, line output transformers and other high frequency wound components like deflection yoke windings and SMPS transformers.

The LEDs on the left side show the Q of the device being tested, more lights = higher Q , i. e., no lights = short circuit, red = Bad or low Q , yellow = ??? or medium Q , green = Good or high Q .
