Our New Human Consciousness Terry Sands,2011-05 Every few thousand years our human culture experiences a massive evolutionary transformation In the next few years our consciousness will change very rapidly and move us beyond anything we can presently imagine This change of consciousness is happening naturally to each of us now and it will affect every aspect of how we think how we live and how we love We are a culture in search of its spirit and this change of consciousness is evolutionarily next for humankind on this planet When the awareness opens one may search many avenues and attractions for truth and enlightenment and find the search lacking in result The next step may be the path of Self discovery But the direction on this path will not be given to us by a great teacher who comes down from the mountaintop with answers cast in stone but rather by lots of little great teachers who could be called pathfinders And to move into this new consciousness we will transform the mind and the way it works with new mental skills and mental technology Our success is inevitable The ease or difficulty with which we achieve this success is still in formation We will survive the transition physically The question is whether we will survive psychologically Psychological survival in this transition depends on only one thing Developing the ability and inner discipline to completely instantaneously unquestioningly and continuously adapt to change
