

## About this manual

### *Its purpose*

The purpose of this manual is to help you get the best value from your vehicle. It can do so in several ways. It can help you decide what work needs to be done, even if you choose to have it done by a dealer service department or a repair shop; it provides information and a schedule for routine maintenance and servicing; and it offers diagnostic and repair procedures to follow when trouble occurs.

It is hoped that you will use the manual to tackle the work yourself. For many simpler jobs, doing it yourself may be quicker than arranging an appointment to get the vehicle into a shop, and making the trip to have it and back in again. Most importantly, a lot of money can be saved by avoiding the expense the shop must add on to you to cover its labor and overhead costs. An added benefit is the sense of satisfaction and accomplishment that you feel after having done the job yourself.

### *Using the manual*

The manual is divided into Chapters. Each Chapter is divided into numbered Sections, which are headed in bold type. Related functions

are listed. Each Section consists of consecutively numbered paragraphs.

At the beginning of each numbered section you will be referred to any illustrations which apply to the procedure in that section. The reference numbers used in parentheses represent paragraph and page numbers and the Step within that section. That is, illustration 3.2 means the illustration refers to Section 3 and Step for paragraph 2 within that Section.

Procedures, once described in the text, are not normally repeated. When it is necessary to refer to another Chapter, the reference will be given as Chapter and Section number (e.g. Chapter 1-16). Cross references given without use of the word "Chapter" apply to Sections and/or paragraphs in the same Chapter. For example, "see Section 8" means in this same Chapter.

Reference to the left or right side of the vehicle is based on the assumption that one is sitting in the driver's seat, facing forward.

Even though extreme care has been taken during the preparation of this manual, neither the publisher nor the author can accept responsibility for any errors in, or omissions from, the information given.

### **NOTE**

A Note provides information necessary to properly complete a procedure or information which will make the steps to be followed easier to understand.

### **CAUTION**

A Caution indicates a special procedure or special steps which must be taken in the course of completing the procedure in which the Caution is found which are necessary to avoid damage to the assembly being worked on.

### **WARNING**

A Warning indicates a special procedure or special steps which must be taken in the course of completing the procedure in which the Warning is found which are necessary to avoid injury to the person performing the procedure.
