what are differential equations solving methods and examples - May 06 2022

web linear differential equation equation of form $y' + p(x)y = q(x)$ linear differential equation a differential equation is linear if the dependent variable y and its derivative appear only in the first degree the general form of linear differential equation of first order is $y' + p(x)y = q(x)$

8 1 basics of differential equations mathematics libretexts - May 18 2023

web oct 18 2018 a differential equation is an equation involving an unknown function $y = f(x)$ and one or more of its derivatives a solution to a differential equation is a function $y = f(x)$ that satisfies the differential equation when f and its derivatives are substituted into the equation
