

## Biology EOC Review

*Answers are in italics.*

**Goal 1: Learner will develop abilities necessary to do and understand scientific inquiry.**  
**28-32%**

**1.01 Identify biological problems and questions that can be answered through scientific investigations.**

### The Scientific Method:

1. List and describe the steps of the Scientific Method. Make sure you include **observations**, creating a testable **hypothesis**, identifying **variables**, **data**, having an **adequate sample**, & **replicating** your **findings**.  
*Purpose/Question, Observation, Hypothesis, Experiment (independent, dependent and controls), Data and Analysis, Communicating Findings, Replicating/Repeating the experiment.*
2. Why do many experiments make use of a **control group**? *Used as a basis of comparison, normal*
3. What are the characteristics of a good experiment? *Large sample size, one variable tested at a time.*
4. What is the difference between an **inference** and a **prediction**? *An inference is a logical interpretation based upon prior knowledge or experiences. A prediction is based upon direct observations.*
5. What are the differences between **hypothesis**, **theory** and **law**?  
*Hypothesis – suggested outcome to a scientific question. Theory – a well supported hypothesis that unifies a broad range of indirect observations. Law – A documented hypothesis supported by direct evidence.*
6. What is the difference between an **independent** and **dependent** variable? *The independent variable (manipulated variable) is what the scientist changes in an experiment. The dependent variable (responding variable) changes as a result of the independent variable.*
7. Interpret graphs. Which axis has the independent variable? Which axis has the dependent variable? When do you use a **bar graph**? **A line graph**? **A pie graph**? *(X,Y) Bar graphs are used for comparisons, line graphs show change over time and pie graphs show a representation of something to the whole.*

### Tools of a Biologist: Things to know about Microscopes

8. How do you **determine the magnification** of the field of view for a microscope? *You multiply the eyepiece by the objective lens.*
9. What happens to the **diameter** of the field of view when you change from low to high power? *It gets much smaller.*
10. How do you estimate the **size** of a cell or cell structure when using a microscope?  
*Micrometers (1.3 mm (millimeters) would be 1300 micrometers)*
11. What do you adjust first on a microscope? What you then adjust when on the highest power? *You adjust it on low power with the coarse adjustment, then use the higher power and the fine adjustment.*

- 1.2 Design and conduct scientific investigations to answer biological questions (create testable hypotheses, identify variables, use a control or comparison group when appropriate, select and use appropriate measurement tools, collect and record data, organize data into charts and graphs, analyze and interpret data, communicate findings).**
12. Graph this data. 13. What is the **independent variable**? *Temperature*

The **dependent variable**? *Rate at which gills open and close*

Cuticle Markus Riederer, Caroline Muller, 2008-04-15 Annual Plant Reviews Volume 23 A much clearer picture is now  
emerging of the fine structure of the plant cuticle and its surface the composition of cuticular waxes and the biosynthetic  
pathways leading to them Studies assessing the impact of UV radiation on plant life have emphasized the role of the cuticle  
and underlying epidermis as optical filters for solar radiation The field concerned with the diffusive transport of lipophilic  
organic non electrolytes across the plant cuticle has reached a state of maturity A new paradigm has recently been proposed  
for the diffusion of polar compounds and water across the cuticle In the context of plant ecophysiology cuticular transpiration  
can now be placed in the perspective of whole leaf water relations New and unexpected roles have been assigned to the  
cuticle in plant development and pollen stigma interactions Finally much progress has been made in understanding the  
cuticle as a specific and extraordinary substrate for the interactions of the plant with microorganisms fungi and insects This  
volume details the major developments of recent years in this important interdisciplinary area It is directed at researchers

levels They seek to improve conditions in classroom teaching and learning professional development and teacher recruitment  
and retention Science Teacher Educators as K 12 Teachers Practicing What We Teach tells the story of sixteen teacher  
educators who stepped away from their traditional role and entered the classroom to teach children and adolescents in public  
schools and informal settings It details the practical and theoretical insights that these members of the Association of Science

Teacher Educators ASTE earned from experiences ranging from periodic guest teaching to full time engagement in the teaching role Science Teacher Educators as K 12 Teachers shows science teacher educators as professionals engaged in reflective analysis of their beliefs about and experiences with teaching children or adolescents science With their ideas about instruction and learning challenged these educators became more aware of the circumstances today s teachers face Their honest accounts reveal that through teaching children and adolescents teacher educators can also renew themselves and expand their identities as well as their understanding of themselves in the profession and in relation to others Science Teacher Educators as K 12 Teachers will appeal to all those with an interest in science education from teacher educators to science teachers as well as teacher educators in other disciplines Its narratives and insights may even inspire more teacher educators to envision new opportunities to serve teachers K 12 learners and the local community through a variety of teaching arrangements in public schools and informal education settings
