Ebook: Managerial Accounting - Global Edition Ronald Hilton, David Platt, 2014-09-16 We are pleased to present this Global Edition which has been developed specifically to acquaint students of business with the fundamental tools of managerial accounting and to promote their understanding of the dramatic ways in which business is changing. The emphasis is on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. There is significant coverage of contemporary topics such as activity based costing, target costing, the value chain, customer profitability analysis and throughput costing while also including traditional topics such as job order costing, budgeting and performance evaluation. Many of the real world examples in the Management Accounting Practice boxes have been revised and updated to make them more current and several new examples have been added. This Global Edition has been adapted to meet the needs of courses outside the United States and does not align with the instructor and student resources available with the U.S. edition.

Agricultural Ethics - An Invitation Robert L. Zimdahl, 2020-08-13 I write because I am concerned that I and my agricultural colleagues have avoided addressing the moral dimension of the environmental and social problems we have contributed to I hope for an exchange of ideas about agriculture's moral dilemmas I encourage my readers to engage in a collective conversation about the dilemmas and avoid remaining in what Merton calls the collective arrogance and despair of his own herd If those engaged in agriculture continue to ignore and fail to realize our common difficulties they will be addressed and resolved by societal pressure and political action which may not yield the resolution we favor The book's goal is not to resolve the moral dilemmas raised It is to raise them and encourage thought and discussion It will ask but not answer why nearly all involved in agriculture have not addressed the moral concerns voiced by the general public The agricultural enterprise is committed to the benefits and future success of the present very productive chemical capital and energy intensive system which is in the minds of many not sustainable The internal justification invokes the moral claim that they feed the world's population The question remains whether or not the prevailing moral justification of feeding the world is adequate given all the issues modern developed country agriculture faces pesticides in soil water and food cruelty to animals Biotech GMO's corporate agriculture pollution by animal factory waste exploitation of and cruelty to migrant labor
