**Service-Learning in the Computer and Information Sciences** Brian A. Nejme, 2012-06-07 Offering a truly global perspective this book serves as a road map for service learning partnerships between information science and nonprofit organizations. It introduces for the first time an essential framework for service learning in CIS addressing both the challenges and opportunities of this approach for all stakeholders involved: faculty, students and community nonprofit organizations, NPOs both domestic and abroad. This volume outlines numerous examples of successful programs from around the world, presenting practical working models for implementing joint projects between NPOs and academia. *Journal of Research of the National Institute of Standards and Technology*, 1996

**Cognitive Development and Individual Variability** Anik De Ribaupierre, Thierry Lecerf, 2019-07-01 The standard approach to cognitive development most frequently consists of cross sectional studies comparing different ages and groups while restricted to a single task. The necessity to focus on the individual in an idiographic perspective rather than on the task or the variable has been repeatedly emphasized most recently in several very important papers by Nesselrode and Molenaar. Variability has also emerged as a crucial characteristic. Moreover, understanding the developmental construction of a given cognitive achievement is imperative to understanding cognitive functioning in adulthood. The general objective of this book is to focus on the individual by studying intraindividual and interindividual variability in various cognitive tasks that is intraindividual variability across items of a given task, inconsistency across various cognitive tasks, dispersion and/or across years, intraindividual change and of course on interindividual differences in intraindividual variability. This book presents empirical studies that have been conducted by research groups in Europe and in North America prominent in the field of variability and development or methodology. The 26 authors/co-authors include senior authors such as Lautrey, Schmiedek, Dauvier, van der Maas, Ghisletta, Stawski, MacDonald and de Ribaupierre. *Handbook of Psychology, Assessment Psychology* Irving B. Weiner, John R. Graham, Jack A. Naglieri, 2012-10-16 Psychology is of interest to academics from many fields as well as to the thousands of academic and clinical psychologists and general public who can't help but be interested in learning more about why humans think and behave as they do. This award winning twelve volume reference covers every aspect of the ever fascinating discipline of psychology and represents the most current knowledge in the field. This ten year revision now covers discoveries based in neuroscience, clinical psychology's new interest in evidence based practice and mindfulness and new findings in social, developmental and forensic psychology.
