A Technical Manual for Parasitic Weed Research and Extension J. Kroschel, 2013-12-01 Parasitic weeds of the families Cuscutaceae Orobanchaceae and Scrophulariaceae are considered to be among the major problems facing agriculture in the Tropics and Subtropics In the last decades enormous efforts have been made and success achieved by scientists all over the world in gaining a better understanding of their biology and ecology as well as of control methods However no substantial reduction of infestation has been achieved in the past and control strategies specific to the different parasites crops and farming systems must be further developed or adapted and realised among a wider farming population with suitable extension methods This Technical Manual provides up to date methodologies for various aspects of research and extension related to parasitic weed species of the genera Striga Alectra Orobanche and Cuscuta It has the intention to support scientists and extension workers of international and national research and extension institutes and universities who are either new to the subject or plan to apply further techniques they are not yet familiar with **Making Quality Cosmetics** Alastair J Gilchrist, 2022-09-05 Making Quality Cosmetics explores the requirements of the ISO standard for cosmetics manufacture and offers technical solutions and guidance on meeting them **Ministry of Defence** Great Britain. National Audit Office, 2008 In 2000 the Ministry of Defence the Department began to develop plans to replace existing diverse systems with a single information infrastructure to enable better communication to promote more efficient ways of working and to obtain better value for money In March 2005 the Department let a contract with ATLAS a consortium with EDS as the prime contractor for the installation and management of a new infrastructure over 10 years The Defence Information Infrastructure Programme DII will eventually incorporate 150 000 terminals for 300 000 users at over 2 000 defence sites including on ships and deployed operations The parts of the Programme which the Department has on contract are estimated to cost 4.9 billion As with other major IT programmes DII is intrinsically complex and challenging In this case the Programme's size and demanding requirements for security and deployment to theatres of military operations are particularly exacting It is also challenging to manage in terms of the complex interconnection with other business change programmes and the level of churn in the Department's business and has had to be introduced into a diverse and in places poor quality estate The Programme reports that it has already achieved or enabled benefits to date of 916 million But the Programme's implementation difficulties have led to key elements of it running 18 months late This delay has led to postponement of the achievement of some benefits particularly the savings associated with switching off legacy systems and the longer term benefits from improved ways of working The National Audit Office makes recommendations on preparation implementation service management and costs Catalog of Copyright Entries.
