Atlas Van Het Vernieuwend Platteland:

Development in Place José C. M. van Santen, 2008 In humanity's struggle to find timely solutions to environmental problems it is easily forgotten that access to our shared spaces has never been equal This collection deals with the landscapes and places of rural urban and wilderness areas in relation development Contributions examine the complex relationship that human beings maintain with their rural and urban environments and with other species in various places and spaces Nothing is taken for granted colonial history globalization localization hybrid relationships colonial or shared architecture religious backgrounds and claims to equal access all fuse with policy strategies This volume discusses these issues within the framework of developmental discourse while asserting the rights of access to the global commons for all world citizens as well as other species

Foot and Mouth Disease A.J. van der Zijpp, M.J.E. Braker, C.H.A.M. Eilers, H. Kieft, T.A. Vogelzang, S.J. Oosting, 2023-08-28 A Foot and Mouth Disease outbreak is not by definition similar to a Foot and Mouth Disease crisis Why then did the 2001 outbreak result in a crisis situation in the Netherlands It was not because nobody was prepared for it The Ministry of Agriculture Nature Management and Fisheries had a scenario in stock The scenario was applied as intended The scenario did what it was supposed to do it prevented the spreading of the disease it resulted in a relatively soon eradication of the disease and it minimised damage to agricultural exports Nevertheless the crisis was there Foot and Mouth Disease new values innovative research agenda s and policies reports a process in which individuals and groups involved in the crisis participated in a joint analysis of what caused the crisis and in the making of a policy and research agenda The conclusion was that ignorance of the societal function of animals and countryside was the cause of the crisis the scenario focussed on Foot and Mouth Disease control in a production oriented environment In reality many people perceived that the scenario and its rigid application threatened nonproduction values such as the companion role of animals and the recreation function of the landscape Inevitably a next outbreak of Foot and Mouth Disease will occur However research and policy makers should seriously take up this perception of animals and countryside to prevent an outbreak of becoming a deep crisis again

The New Dimensions of the European Landscapes R.H.G. Jongman, 2005-05-09 The European Landscape is under stress of changing land use and a changing attitude of its users Globalization the disappearance of the iron curtain and the recent EU enlargement to 25 countries have changed the economic and environmental dimensions of Europe Europe is changing its face from a western and eastern part to one European Union and to fast connections between its centres of activity The rural and cultural heritage of Europe has to be adapted to cope with this change However its landscape is worth to be conserved as well because it represents the European history in the same way as castles and churches It even more represents the history of the common people because it has been the tradition of the rural population that made these landscapes It cannot be prevented that Europe is changing and it is good that Europe adapts to the new dimensions of the world We in Europe have to define what we think is important and

what must be conserved what can be adapted to be used for new functions and what can be abolished because it has no value These decisions will determine the new dimensions of the European landscapes The Frontis Workshop on the New Dimensions of the European Landscape was held on 10-12 June 2002 Wageningen University and Research Centre organized this workshop aiming to develop visions on the landscape in Europe its development and design in the future and to strengthen the international network in landscape planning
