Scher, 2014-08-28 Trauma is the leading cause of death among people under the age of 40 and it ranks third for all age groups Still relatively few clinicians specialize in trauma and training is often obtained through experience The number of trauma patients is expected to continue to grow as pre hospital care continues to advance As well hospitals increasingly see trauma treatment which requires no pre approval as a good source of revenue Given these developments the number of opportunities for specialists trained in trauma including anesthesiologists and critical care physicians will expand in the years ahead This book addresses the need for an up to date comprehensive and clinically focused volume for practitioners and trainees in trauma anesthesia and critical care It is organized by organ system The editor is an attending physician at a major urban hospital center recognized worldwide for its outstanding emergency medical services including trauma care and is recruiting leading trauma anesthesiologists to contribute Anesthesiologists pain medicine physicians critical care physicians and trainees are the target audience

Fundamentals of Neurosurgery Andrei Fernandes Joaquim, Enrico Ghizoni, Helder Tedeschi, Mauro Augusto Tostes Ferreira, 2019-07-12 The aim of this book is to provide clinicians and medical students with basic knowledge of the most

common neurosurgical disorders There is a vast array of signs and symptoms that every clinician should recognize as neurosurgical affectations allowing them to identify when to refer the patient to a neurosurgeon In this text the editors intend to bridge the gap between clinical medicine and neurosurgery making neurosurgical practice understandable to a wider medical public The book provides a smooth transition from neuroanatomy neurophysiology and neurological examination to neurosurgery focusing more on the knowledge underlying neurosurgical practice rather than on surgical technique The core of the book is composed of chapters discussing each of the most important medical conditions that deserve neurosurgical intervention providing key information on diagnosis clinical aspects disease management surgical procedures and prognosis Moreover complementary discussion of the frontiers and advances in neurosurgery are also covered In this sense this book has two main goals and intended audiences First and primarily it is intended for clinicians in a wide array of non surgical medical specialties such as general practitioners neurologists pediatricians oncologists and others aiming to give an overview on important characteristics and initial management of the most prevalent disorders treated by neurosurgeons Second and to a lesser degree it is intended to be used as a practical guide for medical students who are initiating their study in neurosurgical sciences Fundamentals of Neurosurgery A Guide for Clinicians and Medical Students intends to be a comprehensive guide for all non neurosurgeons who want to broaden their knowledge of neurosurgery

Principles and Practice of Maternal Critical Care Sharon Einav, Carolyn F. Weiniger, Ruth Landau, 2020-11-25 This book contains a collection of the most recent insights regarding maternal morbidity and mortality and optimization of the care processes during acute critical illness The volume represents a practical resource to be used in real time by medical practitioners faced with a woman who is critically ill during pregnancy and the peripartum period By providing concise tools for disease identifiers and management flow charts the Editors aimed to increase awareness and improve processes of care for this population Many care paradigms for obstetric patients are currently unstandardized unfocused and often do not follow a pre determined path Each chapter will provide the practitioner with updated information on how to identify specific critical conditions and how to manage them once they have been identified to enhance recognition and readiness This book should be used as a resource to improve the quality of care administered to obstetric patients to reduce fragmented care processes and to improve interdisciplinary co ordination and communication with the overall aim of decreasing maternal morbidity and mortality Therefore this book represents an invaluable guide to specialists in critical care anesthesia and obstetrics as well as to intensive care nurses and midwives
