

# History of Environmental Literature and Criticism

Environmental literature and criticism have evolved significantly over time, reflecting changing perspectives on the relationship between humans and the natural world. This section explores the historical context and key figures in the field.

The roots of environmental literature can be traced back to ancient times, where nature was often personified or used as a metaphor. In the modern era, the Romantic movement emphasized the beauty and power of the natural world, influencing writers like William Wordsworth and John Keats. The 19th-century novelists, such as Henry David Thoreau and Ralph Waldo Emerson, further developed the theme of nature's significance in human life. The 20th century saw the rise of environmentalism as a social movement, leading to the emergence of environmental literature as a distinct genre. Key figures like Rachel Carson, Aldo Leopold, and Gary Snyder played pivotal roles in shaping the field. Contemporary environmental criticism often focuses on the impact of human activities on the environment and the ethical implications of environmental degradation.
