Recruiting, Preparing, and Retaining STEM Teachers for a Global Generation, 2019-05-27 There is a critical need to prepare diverse teachers with expertise in science technology engineering and mathematics STEM with the skills necessary to work effectively with underrepresented K 12 students. Three major goals of funded STEM programs are to attract and prepare students at all educational levels to pursue coursework in the STEM content areas to prepare graduates to pursue careers in STEM fields and to improve teacher education programs in the STEM content areas. Drawing upon these goals as the framework for Recruiting Preparing and Retaining STEM Teachers for a Global Generation the 15 chapters contained herein highlight both the challenges and successes of recruiting preparing and sustaining novice teachers in the STEM content areas in high need schools. Recruiting retaining and sustaining highly qualified teachers with expertise in STEM content areas to work in hard to staff schools and geographic areas are necessary to equalize educational opportunities for rural and urban Title 1 students. High teacher turnover rates in combination with teachers working out of field leave many students without highly qualified teachers in STEM fields. Most of the chapters in this volume were prepared by scholars who received NSF funding through Noyce and are engaged in addressing research questions related to these endeavours. Astrophysics in the Extreme Ultraviolet Stuart Bowyer, Roger F. Malina, 2012-12-06 From the beginning of Space Astronomy the Extreme Ultraviolet band of the spectrum roughly defined as the decade in energy from 90 900 was deemed to be the unobservable ultraviolet Pioneering results from an EUV telescope on the Apollo Soyuz Mission in 1975 forcibly demonstrated that this view was incorrect but it required the all sky surveys of the English Wide Field Camera and the Extreme Ultraviolet Explorer to demonstrate the broad potential of this field Over 700 EUV sources have now been detected Over 150 researchers from 16 countries gathered to share results in this new field at the International Astronomical Union Colloquium No 152 Papers were presented on a wide variety of topics including cool star coronae white dwarf atmospheres and evolution neutron stars the Io torus cataclysmic variable stars active galactic nuclei the interstellar medium winds and atmospheres of early type stars and EUV plasma diagnostics Selected manuscripts from this meeting are provided in these Conference Proceedings
