Africa in Contemporary Perspective Manuh, Takyiwaa, Sutherland-Addy, Esi, 2014-05-08 An important feature of Ghanaian tertiary education is the foundational African Studies Programme which was initiated in the early 1960s Unfortunately hardly any readers exist which bring together a body of knowledge on the themes issues and debates which inform and animate research and teaching in African Studies particularly on the African continent This becomes even more important when we consider the need for knowledge on Africa that is not Eurocentric or sensationalised but driven from internal understandings of life and prospects in Africa Dominant representations and perceptions of Africa usually depict a continent in crisis Rather than buying into external representations of Africa with its lacks and aspirations for Western modernities we insist that African scholars in particular should be in the forefront of promoting understanding of the pluri lingual overlapping and dense reality of life and developments on the continent to produce relevant and usable knowledge Continuing and renewed interest in Africa s resources including the land mass economy minerals visual arts and performance cultures as well as bio medical knowledge and products by old and new geopolitical players obliges African scholars to transcend disciplinary boundaries and to work with each other to advance knowledge and uses of those resources in the interests of Africa s people

The Homeowner Ideology Singumbe Muyeba, 2025-03-24 While homeownership has clear benefits among the

impoverished The Homeowner Ideology shows that the utility of real property rights as an economic resource are severely limited in sub Saharan African cities Although global poverty has declined since 1990 it remains widespread in Subsahara the region with the highest proportion of the global population living in slums Mainstream thinking in development studies is dominated by market fundamentalist neoclassical economics and the premise that ownership reduces poverty Singumbe Muyeba contends that this neoliberal premise is flawed and unsupported by data within the African context Muyeba argues that property rights function as structured idle capital on the formal market in African cities and the persistence of homeownership as the intervention of choice is explained by the influence of neoliberal ideology intergenerational transfer of homeownership culture within the family and the state s deliberate and active support for homeownership tenure

Isaac Vincent Joslin, 2023-05-09 An exploration of Francophone African literary imaginations and expressions through the lens of Afrofuturism Generally attributed to the Western imagination science fiction is a literary genre that has expressed projected technological progress since the Industrial Revolution However certain fantastical elements in African literary expressions lend themselves to science fiction interpretations both utopian and dystopian When the concept of science is divorced from its Western rationalist materialist positivist underpinnings science fiction represents a broad imaginative space that supersedes the limits of this world Whether it be on the moon under the sea or elsewhere within the imaginative universe Afrofuturist readings of select films novels short stories plays and poems reveal a similarly emancipatory African future that is firmly rooted in its own cultural mythologies cosmologies and philosophies Isaac Joslin identifies the contours and modalities of a speculative futurist science fiction rooted in the sociocultural and geopolitical context of continental African imaginaries Constructing an arc that begins with gender identity and cultural plurality as the bases for an inherently

multicultural society this project traces the essential role of language and narrativity in processing traumas that stem from the violence of colonial and neocolonial interventions in African societies Joslin then outlines the influential role of discursive media that construct divisions and create illusions about societal success belonging and exclusion while also identifying alternative critical existential mythologies that promote commonality and social solidarity The trajectory proceeds with a critical analysis of the role of education in affirming collective identity in the era of globalization the book also assesses the market driven violence that undermines efforts to instill and promote cultural and social autonomy Last this work proposes an egalitarian and ecological ethos of communal engagement with and respect for the diversity of the human and natural worlds *Transformative Eco-Education for Human and Planetary Survival* Jing Lin, Rebecca L. Oxford, 2011-12-01

Theology as Construction of Piety David T. Ngong, 2013-12-10 This book argues that a primary purpose of theological discourses is to construct piety or spirituality If this is the case theologians need to constantly inquire into the kind of piety or spirituality which their work may construct Drawing from some important moments in the development of Christian theology such as the development of the Christian doctrine of God in the early church the role of material things in the Christianity of medieval Europe some elements of contemporary postliberal theology and the theology of inculturation in Africa the book argues that theological discourses that appear to be orthodox and innocuous may actually construct forms of piety that may diminish human flourishing The book therefore calls for an ethics of theology intended to ensure that the theologies we construct help in developing a piety that is conducive to human flourishing in the modern world especially for Africans who have suffered and continue to suffer unspeakable dehumanization The book proposes that a theology that may contribute to the flourishing of Africans in the modern world is one that constructs an interdisciplinary spirituality that takes both the spiritual and the scientific seriously

The Oxford Handbook of Africa and Economics: Context and concepts Célestin Monga,Justin Yifu Lin,2015 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the
