Aesthetics And Cognition In Kants Critical Philosophy:

Aesthetics and Cognition in Kant's Critical Philosophy Rebecca Kukla, 2006-07-03 This volume explores the relationship between Kant's aesthetic theory and his critical epistemology as articulated in the Critique of Pure Reason and the Critique of the Power of Judgment. The essays written specially for this volume explore core elements of Kant's epistemology such as his notions of discursive understanding, experience, and objective judgment. They also demonstrate a rich grasp of Kant's critical epistemology that enables a deeper understanding of his aesthetics. Collectively, the essays reveal that Kant's critical project and the dialectics of aesthetics and cognition within it is still relevant to contemporary debates in epistemology, philosophy of mind, and the nature of experience and objectivity. The book also yields important lessons about the ineliminable yet problematic place of imagination, sensibility, and aesthetic experience in perception and cognition.

The Aesthetic Use of the Logical Functions in Kant's Third Critique Stephanie Adair, 2018-06-25 In the third Critique, Kant details an aesthetic operation of judgment that is surprising considering how judgment functioned in the first Critique. In this book, I defend an understanding of Kant's theory of *Geschmacksurteil* as detailing an operation of the faculties that does not violate the cognitive structure laid out in the first Critique. My orientation is primarily epistemological, elaborating the determinations that govern the activity of pure aesthetic judging that specify it as a *bestimmte* type of judgment without transforming it into an *ein bestimmendes Urteil*. I focus on identifying how the logical functions from the table of judgments operate in the pure aesthetic judgment of taste to reveal the moments to which this power of judgment attends in its reflection. CPJ 5:203. In the course of doing so, a picture emerges of how the world is not just cognizable in a Kantian framework but also charged with human feeling, acquiring the inexhaustible inchoate meaningfulness that incites much thinking. CPJ 5:315. The universal communicability of aesthetic pleasure serves as the foundation that grounds robust intersubjective relations, enabling genuine connection to others through a shared *a priori* feeling.

Kant's Aesthetic Theory David Berger, 2011-10-27 Taste is ordinarily thought of in terms of two very different idioms: a normative idiom of taste as a standard of appraisal and a non-normative idiom of taste as a purely personal matter. Kant attempts to capture this twofold conception of taste within the terms of his mature critical philosophy by distinguishing between the beautiful and the agreeable. Scholars have largely taken Kant's distinction for granted, but David Berger argues that it is both far richer and far more problematic than it may appear. Berger examines in detail Kant's various attempts to distinguish beauty from agreeableness. This approach reveals the complex interplay between Kant's substantive aesthetic theory and his broader views on metaphysics and epistemology. Indeed, Berger argues that the real interest of Kant's distinction between beauty and agreeableness is ultimately epistemological. His interpretation brings Kant's aesthetic theory into dialogue with questions at the heart of contemporary analytic philosophy and shows how philosophical aesthetics can offer fresh insights.

Rockmore, 2016-05-03 German Idealism as Constructivism is the culmination of many years of research by distinguished philosopher Tom Rockmore. It is his definitive statement on the debate about German idealism between proponents of representationalism and those of constructivism that still plagues our grasp of the history of German idealism and the whole epistemological project today. Rockmore argues that German idealism, which includes iconic thinkers such as Kant, Fichte, Schelling, and Hegel, can best be understood as a constructivist project, one that asserts that we cannot know the mind-independent world as it is but only our own mental construction of it. Since ancient Greece, philosophers have tried to know the world in itself, an effort that Kant believed had failed. His alternative strategy, which came to be known as the Copernican revolution, was that the world as we experience and know it depends on the mind. Rockmore shows that this project was central to Kant's critical philosophy and the later German idealists who would follow him. He traces the different ways philosophers like Fichte, Schelling, and Hegel formulated their own versions of constructivism. Offering a sweeping but deeply attuned analysis of a crucial part of the legacy of German idealism, Rockmore reinvigorates this school of philosophy and opens up promising new avenues for its study.
